Michelle Di Tomaso	Vancouver, Canada	2019-01-25	Some deserve accurate, up to date breast health information to take care of their own bodies.
Judy Gatehouse	Ottawa, Canada	2019-01-25	The Ontario Ministry of Health recalls me every two years for follow-up screening. Have the provincial ministries of health been part of this decision process?
Annette Vogt-Cearns	Ottawa, Canada	2019-01-25	My family member was not diagnosed early because of an already flawed system. These new guidelines would only make matters worse for women. I am seeing what my family member is going through for treatment and I can tell you it is not something I would wish on my worst enemy. She, and all women, deserve a better system, not this!
MARILYN MANSFIELD	Ottawa, Ontario, Canada	2019-01-25	This is a critical health issue for women.
Stacey Barnes	Canada	2019-01-25	This affects every female. We are losing lives.
Meagan Lewis	Kanata, Canada	2019-01-25	I am signing this petition because every one has a right to proper health care. Breast cancer effects me directly as I know many who are survivors and baffling cancer. This is a very serious epidemic.
Kristin Armstrong	Nepean, Ontario, Canada	2019-01-25	Women deserve better
Rebecca Hollingsworth	Ottawa, Canada	2019-01-25	I was diagnosed at the age of 44. I have dense breasts and found my cancer through breast self exam. These recommendations are terrible and will costs lives. Shame on the Task Force!
Thérèse Ngo	Ottawa, Canada	2019-01-25	Young women with dense breast need early and better screening. Save a life!
Alana Brittain	Richmond, British Columbia, Canada	2019-01-25	I'm signing because women's health is being threatened and is in jeopardy of returning to some outdated mode of thinking. Really Liberal government, you won't get my vote next time.
Janet Gallant	Canada	2019-01-25	I was diagnosed at 56 wish I had known about dense breast earlier than I may have been stage 1 or 2 not a 4 where as of now there is no cure
Tannis Wock	Lampman, Canada	2019-01-25	Please reconsider the guidelines. Women across Canada are in danger of having their breast cancer missed by adhering to the recommendations laid out. If I had not done a self exam by BC would have been missed because of breast density . Mammograms are not effective for everyone but they should not be abandoned.
Merit Elmaadawy	Toronto, Canada	2019-01-25	Early detection of cancer specially in young women mean saving a whole family from a tragedy.

Name	Location	Date	Comment
Merit Elmaadawy	Toronto, Canada	2019-01-25	Early detection of breast cancer specially in young women with children means saving a whole family from a tragedy.
Merit Elmaadawy	Toronto, Canada	2019-01-25	Early detection of breast cancer specially in young women with children means saving a whole family from a tragedy.
Faye Walsh	Summerside, Canada	2019-01-25	Faye Walsh
Cathleen Fisher	Ancaster, Canada	2019-01-25	It is one more way to PREVENT Breast Cancer which is both life saving and cost effective.
Pat Popp	Lac du Bonnet, Canada	2019-01-25	As a breast cancer survivor, I think these new guidelines are deficient and are putting women's lives at risk.
Claire Bertin	Ottawa, Canada	2019-01-25	I have dense breasts but was unaware of the implications of this .
Judy Fung	Calgary, Alberta, Canada	2019-01-25	Early detection saved my life.
Cheryl Clingaman	Ottawa, Ontario, Canada	2019-01-25	The new guidelines are flawed!
Karen Chan	Mississauga, Canada	2019-01-25	I'm signing this petition because these guidelines appear to be taking steps backwards in women's health. There is no way you can convince me early detection is NOT a great advantage to successfully battling breast cancer and advising NOT to do self-exams just seems idiotic to me. What exactly are the qualifications of those who came up these new guidelines? Yes, I understand the anxiety that will come with "false positives" or being called back after a mammogram, but I will take that anxiety ANY DAY over discovering I have breast cancer at a later stage and thus being unable to avoid very aggressive treatment. My sister was diagnosed with breast cancer and that is her story to share, but I am so thankful that she caught it EARLY, with a self-exam! I can't believe this "new" guidelines were published, they seem so outdated and nothing short of dangerous and harmful to women's health!
Esther Saxe	Vaughan, Canada	2019-01-25	esther saxe
Leda Raptis	Kingston, Canada	2019-01-25	I am signing because the chances of getting breast cancer have gone from 1 in 50 in the 1950's to one in 7 today! Early detection at least increases chances of survival. Although with all the technology, research etc the chances of dying of breast cancer today are the same as in 1950!
Connie Jensen	Buck Lake, Alberta, Canada	2019-01-25	My cancer would not have been detected under these new guidelines.
Patricia Phillips	Quinte West, Canada	2019-01-25	Because new guide lines are inadequate! IT IS JUST TO CUT COSTS.
Catharine Buie	Etobicoke, Canada	2019-01-25	I am signing because a dear friend of mine has been diagnosed with stage 2 breast cancer. Needless to say, she has dense breasts.Catharine M. Buie

Name	Location	Date	Comment
Gloria Keogh	Grand Forks, Canada	2019-01-25	Get with it women count..Get those new guidelines in so as we know early detection is the key to recovery ..
Kerry Gordon	Robson, BC, California, US	2019-01-25	Prevention is less costly than cure. Listen to the experts.
Elisabeth Swinton	Mulmur, Canada	2019-01-25	Women should demand the hospital recorded for their mammograms so they can see their breadt density readings. Maybe the cost of hiring someone to process LI those requests will make them see the value in just having your go discuss it with you.
Elspeth Dowell	Montreal, Quebec, Canada	2019-01-25	I mean, what were they thinking! Advising against self-exams, minimizing recalls after mammograms, ignoring the needs of women in their 40s! Yes, indeed, this could lead to loss of lives!
Natalia Pierce	Ottawa, Canada	2019-01-25	It's time our health care system allowed better prevention through proper morr conclusive testing.
Laurie Friskie	Nanaimo, Canada	2019-01-25	I am outraged by this flawed report. Why were there no breast cancer experts on the panel? Why have they ignored the importance of breast density? Is this just another form of misogyny?
Ingrid FRIESEN	Vancouver, Canada	2019-01-25	After all we have learned about breast cancer and the devastation it causes, thus makes no sense. Step up women! We want to be informed about whats going on in our bodies!!! We will take a little anxiety from a false positive over undiagnosed breast cancer ANY DAY!!!
Christine Beevis Trickett	Calgary, Canada	2019-01-25	I'm a breast cancer survivor because a mammogram at age 40 helped diagnose my breast cancer at stage 1. I have dense breasts and had no idea that I had extensive DCIS in my breast until that first mammogram.
Patricia Lyons	Oshawa, Canada	2019-01-25	Patricia Lyons
Jane Miller	Vienna, Illinois, US	2019-01-25	I'm a poster child for early detection. My cancer was found as a pre-cancer, ductal carcinoma insitu (DCIS). Because it was so early, I was able to have a bi-lateral mastectomy with NO chemo or radiation. This allowed me to avoid damaging my body and immune system with these harsh, but often necessary, treatments. I wasn't too far from my 40s, at age 53. DON'T sentence women in their 40s to needing intense treatment or even death!
Jake Kaye	Ottawa, Canada	2019-01-25	A friend would have DIED if she'd followed the unbelievably shortsighted guidelines issued by unqualified people.
jean willoughby	Whitby, Canada	2019-01-25	jean willoughby
Nikki Haftner	Courtenay, Canada	2019-01-25	If I wasn't persistent & followed "guidelines" and asked my doc for a second look. Google told me my symptoms led to breast cancer but my age determined I was too young to check out that bean sized lump that grew to a lemon in 6 months #time for a #change #canada
Wendy McNiven	Comox, Canada	2019-01-25	people I love are affected by this new inadequate guideline.

Name	Location	Date	Comment
Joanne Lincoln	Kemptville, Canada	2019-01-25	I have lost on friend who was screens at 40, I have another with Dense Breasts just diagnosed through MRI and fighting for her life, this Bill is a HUGE step backwards in Women's health
lisa dadswell	Hamilton, Canada	2019-01-25	Quite simply, women need to have the best options available to them.
Joy Nielsen	Kingston, Ontario, Canada	2019-01-25	Ludicrous! As a breast cancer survivor diagnosed at age 48 (in 2010), I would be denied screening if I was younger and I would die as I had an aggressive gene expression..it all amount money..shameful :(
Julie Dube	Courtenay, Canada	2019-01-25	For all the women, especially certain beautiful souls in my life that have been affected by this!!!!
Grethe Lund	Toronto, Canada	2019-01-25	We need new guide lines in breast cancer screening. Women have to be screened after the age of 72. Screening saves lives.
Shannon Groenewegen	Duncan, Canada	2019-01-25	Someone I care about has been terribly affected by her daughters breastfeeding cancer💎
Norman Wallach	St-Constant, Canada	2019-01-25	For my wife
Norman Wallach	St-Constant, Canada	2019-01-25	For my wife
Taryn Rodney	Ottawa, Canada	2019-01-25	We should have more current data & information shared with us!!
Patricia A. Brennan	Kanata, Canada	2019-01-25	As a society we should all stand against that which diminishes our chances of a successful recovery by not testing early enough.
Sylvie Lemonde	Gatineau, Canada	2019-01-25	La mammographie sauve des vies!
Anne Lisowyk	London, Canada	2019-01-25	Too many women under 50 have breast cancer and despite all the advances in treatment, early detection is still the biggest factor in survival rates. Reductions in screening opportunities places too many women at risk. Screening should begin much earlier if the Health Minister is truly interested in saving lives instead of money.
Norman Wallach	St-Constant, Canada	2019-01-26	I was 42 when I received my breast cancer diagnosis. My breast density was kept from me; my doctor relied on white on white mammogram and the cancer progressed, leading to aggressive treatments and surgeries. It's 2019. We live in Canada. Why are women still being patronized and not given accurate and recent information about their own health and bodies?
Leanne Webster	Huntsville, Canada	2019-01-26	My grandmother found her breast cancer in a normal screening
Norman Wallach	St-Constant, Canada	2019-01-26	My wife was diagnosed with aggressive breast cancer at age 42.
Julie Carle	Ottawa, Canada	2019-01-26	Why! With all the new technology why is breat cancer screening so outdated

Name	Location	Date	Comment
Annie Slight	Saint-constant, Canada	2019-01-26	I was diagnosed with breast cancer at age 42. No family history, no genetic mutations. I had very dense breasts, and this was kept from me. The cancer progressed, which led to chemotherapy, port-a-cath surgeries, a bilateral mastectomy, lymph node surgery, reconstruction... Why not promote early detection, in order to minimize the chances of aggressive treatments and surgeries? Don't women deserve recent and accurate information concerning their health and bodies?
Marcia Bell	Toronto, Ontario, Canada	2019-01-26	The guidelines on breast cancer screening put women at risk.
Logan Pickard	Errington, Canada	2019-01-26	I know a bunch of really amazing women who have suffered from breast cancer, it could have been detected much earlier but our medical system is flawed and badly needs to be updated.
Debra DeGagné	Kingston, Canada	2019-01-26	I'm signing because my beautiful daughter-in-law found a lump. Her doctor supported her and sent her for tests. Results were positive and just weeks later she had surgery for bees cancer. Trust your instincts. Be your best advocate
Anne-Marie Fobert	Cornwall, Canada	2019-01-26	I had lobular and ductal cancer in November 2017. Lobular cancer is so hard to detect, woman have to be informed about the consequences of having dense breast.
Tara Cree	Surrey, Canada	2019-01-26	I have friends who have died from breast cancer and others fighting it. We need to advocate for women based on experts, not a random task force. As someone with dense breasts this is even more relevant for me.
Cindy Schmidt	Penticton, Canada	2019-01-26	If these guidelines had been in place just 1 year ago, my tumor would not have been found in time. Instead of a stage 2 diagnosis it would have been a death sentence.
Kathy Guilbeault	Ottawa, Canada	2019-01-26	I'm signing this petition because my sister in law went through this and luckily is now cancer free.
Marj Olson	Saskatoon, Saskatchewan, Canada	2019-01-26	I didn't know that my sisters and I were at risk because the powers that be didn't want to cause anxiety!
Agneta Roberts	Victoria, Canada	2019-01-26	I am a 49 year old breast cancer survivor. I was diagnosed when I was 42. Had my Dr followed these guidelines I would probably be dead today. You should be ADDING ultrasound for women with dense breasts (who should be told about having dense breasts in the first place). Not take away screening!
Dawna Gates	ottawacrescentOttawa, Canada	a,2019-01-26	The new guidelines are going to increase a womans risk.
Gloria Wagner	Chilliwack, Canada	2019-01-26	The lives of women are really important and they deserve better care.
Lisa Smyth	St. John's, Canada	2019-01-26	I am a radiologist in Newfoundland and these guidelines will harm women.

Name	Location	Date	Comment
Debbie Kerr	Guelph, Canada	2019-01-26	I was diagnosed with breast cancer at age 49 before I had ever had a mammogram. That was in 2010. Things should be improving.
Ramona Olenick	Canada	2019-01-26	It's important! Have lost too many to breast cancer!
Judith Stuart	Mississauga, Canada	2019-01-26	My young friend Christine Clark is a survivor because she INSISTED on screening after self-examination gave her cause for concern. Brave woman! But women shouldn't have to be pushy to be saved. Do better, Canada!
Sandy Duke	North Vancouver, Canada	2019-01-26	These guidelines are insulting and wrong. Very disappointed in you, Task Force.
Joan Schmidt	Chilliwack, Canada	2019-01-26	All of us have the right to accurate and up-to-date information, knowledge about our own bodies (in this case, our breasts), and access to the best screening advice and tests. Our lives depend on it!
Christine Whitelaw	Maple Ridge, Canada	2019-01-26	I had a suspicious mammogram and subsequent surgical biopsy at 42. As a niece Of a breast cancer victim I'm grateful to have early screening available.
Leigha Worth	Coquitlam, Canada	2019-01-26	I am signing this for my sister in law who was under 40 when she was diagnosed with breast cancer and my friend Alayne whose first diagnosis was in her early 40's and my daughters who I hope will never have to worry about breast cancer but who deserve the best care to make sure if they do get it that it is detected early.
Colleen Johnstone	Lanark, Canada	2019-01-26	These guidelines put women at risks, unnecessarily.
Carolyne Lynch	Ottawa, Canada	2019-01-26	I have a friend who was diagnosed in her 30's. If these guidelines were in place at that time, she would not be with us today.
Jane Keith	Ottawa, Canada	2019-01-26	My daughter-in-law's female family members have a double sided problematic issue. Dense breasts as well as her Mother has had breast cancer, Mother's twin, 2 young cousins. As a result according to current guidelines is to begin screening 10 years prior to her Mom's age when she was diagnosed. If this change takes place she would have to go to a private clinic for Momogram.
Mark Liepmann	Ottawa, Canada	2019-01-26	Medical decision-making should be supported by the best data possible; not doing so risks lives
Jenn Van Dusen	Kanata, Canada	2019-01-26	I'm a breast cancer survivor, I could have had a preventative mastectomy Year's ago if the hide lines were better.
donna stampone	ancaster, Canada	2019-01-26	I've been through breast cancer and dont want woman to experience this horrible disease . we need to offer more not less
Mary Baxter	Keswick, Canada	2019-01-26	My friend suffered much trauma and a double mastectomy in her 40s because her family doctor refused to send her for a mammogram because she was "too young".
Jennifer Cross	Ottawa, Canada	2019-01-26	I am a survivor.

Name	Location	Date	Comment
Kerri McAllister-Barlow	Addison, Canada	2019-01-26	Early detection saves lives, accurate diagnostics are imperative.
Victoria Kerr	Ottawa, Canada	2019-01-26	Early detection is absolutely essential for survival.
Emma Griffin	Napanee, Canada	2019-01-26	This is important to me as a young woman so i don't have to worry as I get older that I may have a risk of a late diagnosis if I develop breast cancer.
Corinne Smyth	St. John's, Canada	2019-01-26	We wait too long for too much! Too many women in their 40's and earlier have breast cancer! Changing the age for screening is backward! Please don't do this!!!
Ilene Zelewicz	Thornhill, Canada	2019-01-26	We have a right to know what is happening to our bodies....sooner, rather than later, when we can do something about it
Angela Gasson	Nanaimo, Canada	2019-01-26	I lost my breasts to breast cancer, but I couldn't of lost a lot more had it not been for early detection.
Pat Friedrich	Canada	2019-01-26	Vera Patricia Friedrich
Dr. Robin Alter	Toronto, Ontario, Canada	2019-01-26	I believe our health care system should work to save women's lives, not protect them from having mammograms.
Rebecca Lippiatt	Edmonton, Canada	2019-01-26	Women who have dense breasts are more likely to die without proper screening (ultrasound). That's wrong!
Addison Pieroway	Pasadena, Canada	2019-01-26	I'm signing because breast cancer is a concern for my family of girls. These guidelines need revision based on breast cancer experts. Wise up government officials.
Lynne Bohn	Mackenzie, California, US	2019-01-26	My Mum died from breast cancer. I was diagnosed and treated for BC, because I routinely went in for a breast screening every year since I was about 40. I believe my cancer was caught very early because of my diligence in receiving routine screenings. One year I was clear, the next year I had cancer!
Sandra Cave	Cranbrook, Canada	2019-01-26	The need is to have relevant information, not outdated guidelines.
Dee Warrener	Victoria, Canada	2019-01-26	Our young women need clear factual advice about breast cancer and how to avoid and/or detect it early
Jim Harris	Nanaimo, BC, Canada	2019-01-26	Health care decisions should be made on scientific evidence.
Brenda Gillespie	Shuniah , Ontario, Canada	2019-01-26	I am signing because all women deserve the facts about Breast screening ◆
Patricia Sulley	Ottawa, Canada	2019-01-26	It's the right thing to do.
Faye MacDonald	Trenton, Canada	2019-01-27	I want to be updated on Dense Breasts Canada,We have to be able to look after our bodies and need all the info we can get and where to find out where we can be looked after!

Name	Location	Date	Comment
Stephen Park	Hamilton, Canada	2019-01-27	The reviewers need to take into account the latest research. So much has changed, and breast density is a real consideration!
Dense Breasts Canada	Toronto, Canada	2019-01-27	Very sorry to hear this.
Diane Daly	Ottawa, Canada	2019-01-27	How about thousands of women will live if the breast screening guidelines are revised.
Adam Dale	Mill Valley, California, US	2019-01-27	Done. These guidelines are outrageous
Ginny Locke	Glace Bay, Canada	2019-01-27	I have dense breasts and my 95 year old mother had a double mastectomy for breast cancer at 86. My surgeon for two breast biopsies (1994 & 2003) wanted yearly mammograms but because of the guidelines I was only given 2 year appts.!
JoAnne Ouellette	Chatham, Canada	2019-01-27	I have watch more than three women suffer and die from breast cancer before they turned 40
Kerri Grummett	Collingwood, Ontario, Canada	2019-01-27	We need to updates our health guidelines and recommendations to reflect the most up-to-date and best available evidence. Lives are in the balance. Please mobilize the data.
Karen Blotnick	Hammonds Plains, Canada	2019-01-27	My mother died of breast cancer. My sisters and daughters and I are at higher risk for developing breast cancer. These new guidelines do not err on the side of caution. They put women at risk. That is not acceptable.
DEE ALDER	Prince Edward, Canada	2019-01-27	D. Alder
Carol Bellware	Alexandria, Canada	2019-01-27	I have dense breasts and my Mom had a benign tumour removed
Paula Oretsky	Toronto, Canada	2019-01-27	More testing and early detection will save lives. Women should have the best medical care available.
Susan Ruddick	Ardrossan, Canada	2019-01-27	Too many women are being diagnosed at a later stage of breast cancer - young and old and these guidelines will cause unnecessary stress and deaths from breast cancer that could have been cured. Listen to the experts with up to date stats on the benefits of early diagnosis.
Margaret Blotnick	Brampton, Canada	2019-01-27	It's the right thing to do!!!!!!!!!!!!!!
Cheryl Sutherland	Sicamous, Canada	2019-01-27	Because woman's lives are important, there is no legitimate reason for these changes. Is it a money thing???
Naomi Dennis	Sutton Coldfield, England, UK	2019-01-27	Everyone is important but when it comes to abuse f women there should be more help in place and more sanctuaries for them to go to. Maybe a family home for overnight until the police can find a safe place to go. Sure there must be families who would help look after a mum and child overnight.
Leeann Broome	Oshawa, Canada	2019-01-27	I am signing this petition because I strongly agree that women in their 40's should be screened for breast cancer, furthermore, I

Name	Location	Date	Comment
			believe that women with dense breasts should also be screened by ultrasound. Too many women die without these tests.
Rosilene Kraft	Port Moody, Canada	2019-01-27	My former GP discouraged me from having mammograms before 50, although I had had yearly exams before moving to Canada. I wasn't able to find anything abnormal in my self-exams. I just found out I had MBCa last November because of a metastasis to my hip bone. Still, it was diagnosed after I saw a new family doctor.
Bonita Huhn	Grimsby, Canada	2019-01-27	We most certainly need more updates modern technology and today's world.
Wanda Lozinska	UK	2019-01-27	Money is needed for proper biomedical research into ME so sufferers can be accurately diagnosed and given appropriate treatment.
Judy Pimlott	Richmond Settlement, Canada	2019-01-27	Judy Pimlott
N A	Toronto, Canada	2019-01-27	My almost 40 year old daughter falls into this category..my personal Breast cancer experience does not have to be her fate in life
Kevin Miller	Ottawa, Canada	2019-01-27	Common sense.
Sandra Frederiks	Coquitlam, Canada	2019-01-27	I was shocked at the new guidelines. Many women are going to die untimely, miserably painful and preventable deaths under these guidelines.
Laryssa Korbutiak	Ottawa, Canada	2019-01-27	Prevention is key!
Neilda Hayes	Ottawa, Ontario, Canada	2019-01-27	These new guidelines will cost lives. There is data to prove this. I am not prepared to lose the lives of women for a poorly designed experiment.
Zoe Fowler - MacKenzie	Kingston ON, Canada	2019-01-27	I am signing this because breast screening needs to be revised for the safety and health of women and men in our country. Zoe
Glenda Craig	Port Coquitlam, British Columbia, Canada	2019-01-27	I'm a breast cancer survivor who had yearly mammograms until told that they wanted me to go only every second year. By that time the tumour was nearly 5 centimetres across but luckily for me I had great Doctors. Surgery, chemo and radiation. Blood clots formed and I was away from work for 15 months. Luckily I am still here after nearly 10 years. If I had been checked yearly the tumour would have been smaller and I possibly would not have needed so much help. I now go for a mammogram every year, and I feel safer.
Rayvin Maddock	Airdrie, Canada	2019-01-27	I was diagnosed with breast cancer at age 30. Screening for those under 50 is very important.
Crystal Harnett	Crestview, Florida, US	2019-01-27	I was diagnosed at age 30, and all of my oncologists have said their is an influx in younger women getting breast cancer. Early detection saves lives and has best prognosis. Give the younger women a fighting chance!

Name	Location	Date	Comment
Adonia Foster	Dawson Creek, Canada	2019-01-27	I lost Beautiful daughter 32 years old 10 months again after a 5 1/2 year battle with cancer that she fought fiercely!
Shawn Goldenberg	Toronto, Canada	2019-01-27	My wife was found to have breast cancer at 49 only because she insisted on further testing. If she relied on the government mandated procedures then she may have not have found it until it was too late to treat cost effectively. Typical of governments to save pennies now but incur many dollars of expense later.
Gillian Raphael	Vancouver, Canada	2019-01-27	It's all about the screening and early diagnosis.
Michael Sachs	Burnaby, Canada	2019-01-27	I am signing this petition As the son in law of someone who would have lived had screening been properly followed...
Susan Gerulath	Toronto, Canada	2019-01-27	Susan Gerulath
nancy oldham	Richmond, Canada	2019-01-27	I have dense breasts, have breast cancer in my family, and know ultrasound is better for me and my health than mammograms
Gayle Prowett	Chilliwack, British Columbia, Canada	2019-01-27	Proper breast screening saves lives
Wendy Banham	Vancouver, Canada	2019-01-27	As a survivor of breast cancer, I'm appalled that the government is advising against mammograms and self exams. If it weren't for a mammogram, my cancer would not have been detected so early, and who knows the outcome?! Please reconsider!
Krista Mason	Canada	2019-01-27	Better to be safer than sorry
Sarah Hunt	Pakenham, Canada	2019-01-27	My health is important.
Barbara Walker-Renshaw	Oakville, Canada	2019-01-27	I'm signing because the new guidelines are not based on the most recent scientific research. Women's lives should not be put at risk by reliance on outdated data and patronizing assumptions by women's ability to tolerate further screening.
Lisa Hartmann	Vancouver, Canada	2019-01-27	I have breast cancer and had it not been for self exams mine could have been worse. This is bs and I am appalled that this misinformation is being spread
Kathy Boroski	Milton, Canada	2019-01-27	Found my cancer through a routine mammogram.
Roberta Brannan	Toronto, Canada	2019-01-27	... the guidelines don't make a lot of sense. There is no mention of another issue I have. 74 is the cut off age... many older women also get breast cancer. Seems we don't matter. Hoping I can get my last one in by April.
Joanne Bradley	Deux-Montagnes, Canada	2019-01-27	This is so important for the lives and health of women!
Colleen Paterson	Oshawa, ON, Canada	2019-01-27	All Guidelines should be periodically studied & updated accordingly....there are always enormous amounts of money raised for research, but, this is another area that should be investigated

Name	Location	Date	Comment
Sarra gau	North Vancouver, Canada	2019-01-27	I am signing because the guidelines and many doctors including mine ignore dense breasts with a shrug and "there's no other screening recommended"
Carol Sanderman	Victoria, Canada	2019-01-27	I have dense breasts. I self check regularly and have found masses been sent for both mammograms and ultrasounds. To my relief there has been no cancer found. I want all women to have the best care as I have had to date. I have too many women in my life that would no longer be here without early detection.
Jennifer Jessup	Vancouver, Canada	2019-01-27	I am a breast radiologist and have seen first hand that annual mammograms (including in women aged 40-50) help us detect breast cancer & save lives.
judy cameron	Pointe-Claire, Canada	2019-01-27	Our mothers, sisters, & ourselves deserve to have up to date SOLID information which is not being done here. UPDATE!
Faye Chinn	Okotoks Alberta, Alberta, Canada	2019-01-27	This is so archaic it is unbelievable! Why the government would choose to endanger the lives of so many women, and men, too, is beyond comprehension. Please sign. Do NOT allow us to go backwards. Lives count on this.
Janet Brooks	Kelowna, Canada	2019-01-27	In 2017, there was an estimated 103,200 new cases of cancer in Canadian women and breast cancer was at the top of that list, making up 26% of those cases (26,300 women). In females, the lifetime probability of developing cancer is 12.4%. However, most breast cancer diagnoses are in women aged 50-69 (51%). The second largest group is women 70+, with 32% of breast cancer diagnoses in this age group. This means only 17% of breast cancers are expected to be diagnosed in women under 50 and most of these cases (13%) are in women between the ages of 40 and 49. Therefore, only 4-5% of diagnoses are predicted to occur in women under the age of 40.
Katherine Bobyn	Ottawa, Canada	2019-01-27	Diagnosed with aggressive breast cancer at 44. Not that uncommon.
Debra OConnor	Surrey, Canada	2019-01-27	My mother passed away in 1965 at the age of 34. Left 5 children behind, ages 4-11. I received my first "you have dense breasts after my mammogram in the fall of 2018. I've had multiple scans and biopsies of my right breast for "unusual " test results. 50% of my siblings are cancer survivors at an early age. I feel like a ticking time bomb. The task force guidelines put me at risk.
George Stamatis	Montreal, Canada	2019-01-27	Need your help! were diagnosed with aggressive breast cancer. We need everyone to send a message that the Task Force Recommendations are unacceptable! -Women Under 50 need to be screened for breast cancer-These guidelines ignore the risks of breast density-These guidelines advise against breast self-exams !-These guidelines ignore current dataAnd a lot more!We can't have this for our daughters, mothers, aunts, friends and MEN !Please sign the petition. WE need the Health Minister to know that these guidelines are unacceptable.Please share this with everyone you know. Let's share this across Canada !

Name	Location	Date	Comment
Nancy Douglas	Surrey, Canada	2019-01-27	My sister had breast cancer in her 40s
Susi Hill	North Vancouver, Canada	2019-01-27	I see ever day the women who are alive because if screening.. imagine being thanked for saving someone's life daily. And I am just the front line mammographt the real work gets done with the 2nd and subsequent surgery. But we see then smiling and alive.
Sheldon Baker	Langley, Canada	2019-01-27	I love the women in my life!
Sue Gilmour	Ottawa, Canada	2019-01-27	Firmly believe preventive measures save lives & adapting to these guidelines is irresponsible.
Brenda Gibson	Ottawa, Canada	2019-01-27	We need to move ahead not back! If this was prostate policy we would be shouting for them too.
Kate Pocock	TOnto, Canada	2019-01-28	The new Canadian Task Force Guidelines on Breast Cancer Screening are terrible. If new breast cancer screening guidelines are not revised many Canadian women will die. As a sister and daughter of women who had breast cancer, I am regularly screened for breast cancer. Under the old guidelines, the screeners always tested twice because of dense breast tissue and family history. Please hire breast cancer experts immediately for the Canadian Task Force on Preventive Care, and do all you can to help Canadian women prevent and treat this terrible disease. It is terrible that women are not treated equally with comparison for men regarding heart disease. This is too much to hear that this cancer affecting breasts is not being treated with the utmost care and attention for prevention and treatment! Thank You.
Tomi Smith	Warner, Canada	2019-01-28	I'm signing because I have breasts and at risk because I do. If more men got breast cancer or those people in charge of this program got this kind of cancer would things change for the better?
susie johns	Victoria B.C, Canada	2019-01-28	This is a very important screening for all women it saves lives
Luisa Campos	Belo Horizonte, Brazil	2019-01-28	Come on prevention and early identification are the only chances for woman survival when it comes to breast cancer - we need access to more mammograms in Canada
Cathy Gerrow-Cannon	Port Perry, Canada	2019-01-28	I sign for all my sister's. Breast cancer needs to be cured.
Colleen Racine	Orleans, Canada	2019-01-28	I'm signing because I am a survivor and I am because of early detection
Nancy Thayer	Ottawa, Canada	2019-01-28	Please make these decisions with the most recent data available. Not the outdated data that you appear to be using. When the experts in this area are not listened to - something is seriously wrong.
Sherron Birkett	Brantford, Canada	2019-01-28	I want to save my daughtet
Sandra Steur	Chilliwack, British Columbia, Canada	2019-01-28	The new Canadian Task Force Guidelines on Breast Cancer Are dangerous.

Name	Location	Date	Comment
Angela Greiter	Hamilton, Canada	2019-01-28	screening saves lives
Darlene Houghton	Kentville, Canada	2019-01-28	Right thing to do.
Claire Mitchell	Ottawa, Canada	2019-01-28	Claire Mitchellpeterclairem@aol.com
Corina Clouthier	Ottawa, Canada	2019-01-28	As a volunteer at LGFB I see and meet many women under the age of 50 that are going through or just completing treatment for breast cancer. This is irresponsible of the government. Again, women's health is taking a back seat.
Ron Brunton	Wolfville, Canada	2019-01-28	Screening is of critical importance and women know this. I have family and friends who are alive because of screening.
Barbara Hodkinson	OWEN SOUND, Canada	2019-01-28	Breast cancer survivor
Stephanie Gallo	Brantford, Canada	2019-01-28	Keep on sharing!!!
judy balla	Winnipeg, Canada	2019-01-28	I have daughters in their 40s and my friends were diagnosed with breastfeeding cancer after a mammogram when they were in their 40s So who came up with these asinine guidelines? Let me guess ; some idiot men.
Karen Johnson	Maple Ridge, Canada	2019-01-28	Breast cancer survivor. Only 38 when I went through it, and it was found by self evaluation.
Lynn Peregrino	Surrey, Canada	2019-01-28	To help early detection of breast cancer especially to dense breast patients...
Jil Brody	Winnipeg, Canada	2019-01-28	Early detection saves lives. Home checking saves life. It seems counterintuitive to implement these below par standards.
Norma jean Cressman	Sarnia, Canada	2019-01-28	My niece died of breast cancer and left a ten year old child
Nancy Palson	Kamloops, Canada	2019-01-28	My health, my daughter's and friends health are very important and precious.
Jen Mac	Canada	2019-01-28	Stop the insanity !!!
Alexandra Maas	Oliver, Canada	2019-01-28	I have dense breast tissue and the mammogram showed an abnormality, there was no lump and the spot was difficult to find. Coming up to my 5 year anniversary. Screening saves life's.
B Daniels	Halifax, Canada	2019-01-28	Because I believe in science, and science tells us we all need a density determination. Doesn't seem like we have to sign petitions to get tests for predominantly male disease testing. Why do we have to do it for women? A density test will hurt no one and will save lives.
Patricia Dixon	Gilmerton, Scotland, UK	2019-01-28	My family has high risk of breast cancer, screening is important

Name	Location	Date	Comment
Gail Evans	Ottawa, Canada	2019-01-28	Without mammograms my breast cancer would not have been detected early at age 73.
Terri Hooft	Windsor, Canada	2019-01-28	Terri Hooft
Maggie Harbert	Arnprior, Canada	2019-01-28	Expert advice should be followed
Jennifer M Benedict	Arnprior ON, Ontario, Canada	2019-01-28	There is a history of breast cancer in my family.
Lori Lopez	Ottawa, Canada	2019-01-28	I'm signing because this needs to change!
Paula McCooley	Ottawa, Canada	2019-01-28	This policy jeopardizes the health of Canadians.
Martin Yaffe	Toronto, Canada	2019-01-28	Canadians deserve honest accurate information from govt. Task Force Guidelines misinform women and physicians and will lead to more death and suffering from breast cancer.
Michelle Maldaner	Red Deer County, Canada	2019-01-28	I have been diagnosed with stage 3 invasive lobular carcinoma, and extremely dense breast tissue. If it had been caught a couple years prior by NOT following their guidelines I would not have had to go through all that I have.
Edna McConnell	Clinton, New York, US	2019-01-28	3D mammogram saved my breast. The cancer did NOT show up on the regular mammogram. I always have an annual mammogram.
Karin Gebert	Baie-D'Urfe, Canada	2019-01-28	This means saving lives! How can the Health Minister be so anti-women and irresponsible?
Judy Shotton	Port Moody bc, Canada	2019-01-28	I've had breast cancer.
Judy Torres	Hamilton, Canada	2019-01-28	I know a cancer survivor
Kathleen Simpson	Bashaw , aB, Canada	2019-01-28	I am signing because I am a high risk female. In 1963 my mother passed away because of breast cancer and I have been fortunate enough to survive with only a benign lumpectomy so far. If it was not for the diligence of my medical professional this could have been a lot scarier. My health begins with me and self examination is a good start. Trust your doctor, not a task force!
Brenda Jackson	Ottawa, Canada	2019-01-28	I have many friends who got breast cancer before 50. And I want to know the density of my breasts as well.
Tanya Sand	Canada	2019-01-28	Because it means gambling with lives. Early detection often means life or death, especially in women who have dense breast tissue (which is common, myself included) making it all the more difficult to detect and easy to overlook. And bc my mother's cousin, a mother of two, died at the age of 34 from breast cancer.
Tina Lepage	ottawa, Ontario, Canada	2019-01-28	My best friend died of breast cancer in her 40's
Christopher Barnes	Carp, Canada	2019-01-28	Because women matter. Beyond me why this government would go the opposite direction of what they say

Name	Location	Date	Comment
eileen woodside	Ottawa, Ontario, Ontario, Canada	2019-01-28	I'm signing because I believe we need to minimize the risk of breast cancer statistics for women of all ages..
Patricia Button	Brussels, Canada	2019-01-28	I regularly get a mammogram every two years and usually a biopsy every four. I have friends and relatives that have lost breasts due to being unable at a very young age to get a mammogram when they had breast cancer.
Krista Nangle	Ottawa, Canada	2019-01-28	Krista Nangle
Dulcy Huard	victoria, Canada	2019-01-28	I am a breast cancer survivor,these new guidelines would have cost me my life as I had large ,very agressive area near my chest wall,that was growing very fast.and I was already having yearly mammograms .since it was so deep inside screenings had difficulty catching me in time.
Connie Fidlin	Guelph, Ontario, Ontario, Canada	2019-01-28	We want the truth! We have a right to know!
Kammy VanBoven	Sarnia, Canada	2019-01-28	1. Most women would rather deal with the fear of waiting for their results then the fact their cancer could have been cured. I have been recalled and I would take that feeling 100 times over finding out I have cancer that could have been cured if caught earlier.2. I have seen first hand what happens when women in their 40's do not get screened. We are not percentages. Please tell the people who are dying of breast cancer that since they were only the 24% that could have been saved their lives aren't worth the "worry" 10% might have.
Debbie Weedmark	Pembroke, Canada	2019-01-28	Very important for the lives of many women!
Judy Vincent	Edmonton, Canada	2019-01-28	I am truly appalled that the institution in place to provide accurate timely information to the women of Canada, can not be bothered to take the time to update these standards using the wealth of knowledge we have available is troubling. This is a batter of life and death for many and it should be taken seriously as such!!!
Debra Cantwell	Hamilton, Canada	2019-01-28	This is change is not acceptable. It out many women at risk of breadt cancer being undiagnosed.
Kathy Landberg	Langley, Canada	2019-01-28	I personally have dense breast and on the watch list now and times have changed and so does screening as well. Especially for those women who have and had it in their Family should start early as 20's because of this as some women are dying in those years from Cancer! Also there is maybe more than one type of Breast Cancer out there and has to be looked at and treated properly! We also need to treat each person differently with many options out there in order to survive this horrible disease
Anastasia Mertikas	Ottawa, Canada	2019-01-28	My cousin was diagnosed w aggressive breast cancer at 34 (chemo, radiation, removal, hysterectomy, reconstruction)
Linda Jordan	North Vancouver, Canada	2019-01-28	What is wrong with this group that they would go back to the dark ages on a subject that is so important to women everywhere? This is NOT moving us forward, this is moving us back.

Name	Location	Date	Comment
Sarah Manchuk	Winnipeg, Canada	2019-01-28	A mammogram missed my mom's lump in her milk ducts. A self exam caught it. (approximately 2yrs ago now) The doctors also ignored the symptoms present before and after the mammogram. My mom persisted, especially after finding the lump. Needless to say, it was something most women don't know about. It had it's own blood source. These types are pre-cancerous. Breast Cancer is high in my family. A self-exam saved her. These new guidelines are reckless and need to be rejected.
Kate Banham	Chilliwack, Canada	2019-01-28	It is very important that women under 50 continue to have access to breast screening. Early detection gives a much better chance of recovery and in the long term, costs the government less
Valerie Fitzpatrick	Milton Station, PE, Canada	2019-01-28	We need proper updates to breast cancer screening guidelines.
Alana Bull	Kamloops, Canada	2019-01-28	It is necessary for the changes to be void as I did regular mammograms and self exams and also had dense breasts but had two mammograms before finding cancer of an aggressive stage 3. Things need to change and it's for all those women and men who have had issues before and after.
sally martyniuk	Glen Williams Ontario, Canada	2019-01-28	I am signing this petition because I believe in the use of mammograms for early detection of breast cancer leading to better outcomes. The new Canadian Task Force guidelines are inherently flawed and should be revised based on strong scientific evidence and the advice of breast cancer experts.
Sandra Stringer	Lethbridge, Canada	2019-01-28	I have dense breasts and I am in my 40s. These new guidelines are terrifying and must be revised.
Janice Vanderzwan	Langley Twp, Canada	2019-01-28	As a mammogram technologist who sees women in their 40s diagnosed with breast cancer, I'm outraged with the new guidelines! I'm signing to save lives!
Nicole Behie	Canada	2019-01-28	Education is key, share and get people reading and signing! All support helps ##
Carol Cote	Barrhead, Canada	2019-01-28	I am signing because on my mother's of the family there's a lot of breast cancer plus other cancers as well. Since the mammogram isn't sufficient for dense breasts, the Doctor needs to order an altersound as well. Unless there's something that will do a better job. I have dense breasts and I am going to ask for both this year!
Dean Roach	Calgary, Canada	2019-01-28	For my sister
Diane vanderzande	Kenora, Canada	2019-01-29	Breast cancer survivor both times found with mammogram
Lori Gerber	Winnipeg, Canada	2019-01-29	I am one of many breast cancer victims whose cancer was missed in a mamogram.I am stage 4 and currently responding to treatment.
Shelly Ireland-Foran	Canada	2019-01-29	I think this is very important.

Name	Location	Date	Comment
Caryn Wheeler	Olds, Canada	2019-01-29	This is outrageous and so incredibly infuriating. The new screening guidelines for breast cancer must be rejected because they are dangerous and will cause loss of life.
Koreen Gross-Keeler	Calgary, Canada	2019-01-29	I have dense breasts, am between 40-49, and have a family history of Breast Cancer... I believe that all women, regardless of family history, needs to take their health into their own hands and get screenings done regularly to catch cancers early - the earlier the diagnosis, the easier to cure, and the greater chance at a longer life.
Tanya Noble	Claresholm, Canada	2019-01-29	I don't fall in the age bracket for a mammogram yet there's a family history of breast cancer! I lost an aunt to breast cancer!
Sarah Ingalls	Saint John, New Brunswick, Canada	2019-01-29	Thousands of Canadian women will die if the new breast cancer screening guidelines are not revised.
Ann Marie Estrela	Oakville, Canada	2019-01-29	Many women in my family have died.
Susan Clark	Saint John, Canada	2019-01-29	Breast Cancer Survivor...diagnosed at 37 after I found a lump during a self examination. These new screening guidelines are insane and will result in many deaths.
Stephanie Van Dyk	Westbank, Canada	2019-01-29	I loved in Ontario with this regulation and my grandmother had breast cancer but that didn't change the doctors actions. I now live in BC where I can have regular mammograms, if I chose. Women need to be able to take charge of their own breast health. It is imperative
Heather Hartry	Winnipeg, Manitoba, Canada	2019-01-29	I am concerned that the current guidelines will result in unnecessary deaths.
Joan Bush	Markham, Canada	2019-01-29	I had dense breasts. I never knew and as a result the three tumors in my right breast weren't detected. The reason they were finally found was because the tumor in my left breast was larger which started a round of ultrasounds and an MRI. We need to stand up and fight for our lives.
Lorette Van Staalduin	CCalgary, Canada	2019-01-29	Who exactly assigned these people to the Task Force? Sounds quite ridiculous to not assign actual cancer specialists! Then they ignored the advice of experts; another ridiculous decision.
Igleimys Alarcon	Gatineau, Canada	2019-01-29	I don't want to die because a breast Cancer wasn't diagnosed on time
Sally Rosevear	Prince George, Canada	2019-01-29	I am signing because I have listened to the research on what changing the guidelines could mean. As a woman I see the new guidelines as poorly thought through and risky. I would much rather have a false positive than miss an opportunity to treat a cancer at an earlier stage.
Carla Mariacher	North Vancouver, Canada	2019-01-29	I implore you to make revisions to the Canadian Breast Screening guidelinesWOMENS LIVES DEPEND on the changes!
Dense Breasts Canada	Toronto, Canada	2019-01-29	indeed!

Name	Location	Date	Comment
Dense Breasts Canada	Toronto, Canada	2019-01-29	Absolutely!
Dense Breasts Canada	Toronto, Canada	2019-01-29	Indeed- no breast cancer experts and instead we have 2 nephrologists, a gastroenterologist and psychologist. 130 breast cancer experts have signed a letter opposing the guidelines.
Wilma Van Schelven	Corvallis, Oregon, US	2019-01-29	It's important for women in their forties to be examined.
Dense Breasts Canada	Toronto, Canada	2019-01-29	They will indeed- that's a fact
Eileen McMahon	Richmond Hill, Canada	2019-01-29	One woman missed is one too many.
Dense Breasts Canada	Toronto, Canada	2019-01-29	unfortunately that is true
Jennifer Schmidt	Pilot Butte, Canada	2019-01-29	These are absolutely ridiculous guidelines!
Dense Breasts Canada	Toronto, Canada	2019-01-29	Thank you for your comment and for signing
Dense Breasts Canada	Toronto, Canada	2019-01-29	thank you for signing
Dense Breasts Canada	Toronto, Canada	2019-01-29	yes indeed and our govt needs to act
Dense Breasts Canada	Toronto, Canada	2019-01-29	thank you for signing
Iveta Janickova	Coquitlam, Canada	2019-01-29	I was diagnosed before age 50 by mammogram with aggressive breast cancer while I had no symptoms at all and theoretically had no risk factors
Miyuki Dube	Lethbridge, Canada	2019-01-29	I don't understand that we see more and more breast cancer awareness by the public groups but the gov breast cancer guidelines get worsened. Breast cancer can be cured if diagnosed and treated at an early stage!
Alannah Nimeck	Canada	2019-01-29	I believe in awareness and early screening of breast cancer.
Corinne E. Collins	Calgary, Canada	2019-01-29	This is a must..and I insist.
rose Campbell	Eckville, Canada	2019-01-29	At age 38 I had breast cancer after being told for 2 years oh no you are too young to have cancer
Tammy Willock	Stoney Creek, Canada	2019-01-29	I have breast cancer.
Janice Nice	Kelowna, Canada	2019-01-29	These new guidelines are ridiculous! I was diagnosed with stage 3 IDC with ZERO family history or genetic factors- at age 41!! I found the lump myself while doing a self exam..this is just playing with lives here!
Michele Butot	Victoria, Canada	2019-01-29	I'm signing because I have dense breasts and six years ago found an aggressive triple negative tumour that had been missed on mammogram within the previous month. My surgeon said my breast self exam likely saved my life.

Name	Location	Date	Comment
Dori Ditchburn	Kamloops, Canada	2019-01-29	I believe early detection saves lives
Wayne Wiens	Vancouver, Canada	2019-01-29	My sister was diagnosed with breast cancer when she was forty. She died at 45.
Lindsey Hole	Beaverlodge, Canada	2019-01-29	I made my reason for signing very clear here: https://thisholetruth.blogspot.com/2019/01/how-to-sav
Gloria Derkach	Russell, Canada	2019-01-29	Unbelievable! Three woman in my immediate family were diagnosed between the ages of 38 & 42. Early detection and self exam saved their lives, and quite possibly their daughters lives!
Nancy Burton	Hammonds Plains, Canada	2019-01-29	Please don't support outdated and ill informed recommendations. Regular mammograms and self exams save lives.
Gina Lazarowich	North Vancouver, Canada	2019-01-29	Let's get the best-of-the-best equipment for detection and aim to never loose another mom, grandma, sister, friend, teacher, co-worker, anyone...don't we owe it to them?
Ernest Coumont	Finch, Ontario, Canada	2019-01-29	I believe the breast screening program should be upgraded, the mammogram should be replaced!
andrea johnston	ottawa, Canada	2019-01-29	These services are important to my health
Ernest Coumont	Finch, Ontario, Canada	2019-01-29	I believe the Mammogram is an outdated tool which has the potential to spread tumors due to the trauma caused by compressing the breasts of patients who are already infected by tumor cells in their system. Plus Mammogram technology is not capable of diagnosing early stage Breast Cancers on women with dense breasts.
Lorraine Thompson	Chance Harbour NB, Canada	2019-01-29	I am signing this petition as a breast cancer survivor this is not acceptable. The health of individuals should be the top priority,these measures put lives at further risk. If anything there should be more intense and more frequent screening you can't put a price on saving lives.
Rebecca Verge	Brighton, Canada	2019-01-29	I was diagnosed early. It saved me from the experience of Chemo & Radiation.
Joanne Di Tomasso	Montréal, Canada	2019-01-29	Early screening saved my life. I was diagnosed with breast cancer on my early 40s.
Carole Vickers	West Sussex, England, UK	2019-01-29	Imperative as they are Mums, Sisters, Daughters, Aunties, Friends & Colleagues
Vanessa leBourdais	Port Moody, Canada	2019-01-29	My mother would have died under these guidelines. They are anti science and nonsensical.
Carol Prindiville	Haliburton, Ontario, Canada	2019-01-29	Let's get with the 21st century!Proper health care for Women!
Judy Pfeifer	Yorkton, Canada	2019-01-29	I'm signing because I did get breast cancer at the age of 43. I did find the lump myself and now my daughter was diagnosed at the

I"
e-life.htm

Name	Location	Date	Comment
			age of 38. More needs to be done on early detection and earlier screening.
Mylène Lefebvre	London, Canada	2019-01-29	I am a woman approaching my 40's. I have young children who need their mom.
Jo-Ann Cuvelier	Halifax, Canada	2019-01-29	My niece had breast cancer and several of my friends. New guidelines are inadequate and quite shocking. Treatment is so costly to tax payers and often the side effects greatly impacts our future well being.
Louise Bédard	Baxter's Corner, NB, Canada	2019-01-29	As a breast cancer survivor who has dense breast tissue and with a daughter at high risk, I want to make sure the guideline will protect my daughter and all women
Terry Svienson	Tyndall, Canada	2019-01-29	This is very importantsnt to women snd their families.
Christine Servant	Courtenay, Canada	2019-01-29	I was diagnosed with Stage 2; Grade 3; Triple Negative Breast Cancer at age 47. The guidelines need to cover this age range, or lives will be unnecessarily lost.
Joy Veinot	Halifax, Canada	2019-01-29	I have dense breast tissue....I found a lump in my breast after having a mammogram - I was mammogramed many times and the lump could not be seen.
Shawn Adair	Eckville, Canada	2019-01-29	My bride is a survivor and had to fight for screening.
Joanne Theriault	Middle Sackville, Nova Scotia, Canada	2019-01-29	I have dense breasts and my sister had breast cancer. Very important for proper screening!!
Carrie Moffat	Burlington, Canada	2019-01-29	I was diagnosed with early stage Breast Cancer at 38 because of my own persistence, if I waited till I was in my 50s my story would be much different. I have no family history of Breast Cancer and do not carry the gene.
DOROTHY Taylor	Vernon, Canada	2019-01-29	I do not want to cry over women who die needlessly in the 40 year age bracket who may be alive if screening were in place.
Faith Fontaine	Winnipeg, Canada	2019-01-29	I'm signing because my mom was just recently diagnosed.💎
Kenneth Newbert	Vancouver, Canada	2019-01-29	My wife has dense breasts and only by the grace of god her breast cancer was discovered early and successfully dealt with.
Julia Gear	Canada	2019-01-29	These guidelines are useless.
LEIGH SQUIRES	Fanny Bay, Canada	2019-01-29	I am a woman, and I care.
Roxanne Morine	Grande prairie, Canada	2019-01-29	Please don't let more women die because of this barbaric screening .. I was 44 and diagnosed because I found my lump doing self examine.
GWEN Jahelka	Nanaimo, Canada	2019-01-29	I am signing because I was under 50 when I found my pump by self examination. I was due for my routine screening so I did not put it

Name	Location	Date	Comment
			off. They caught it early so it had not moved into my lymph nodes. I am so grateful. Changing the guidelines to save a few dollars will only cost more lives and increase treatment costs in the end.
Josee Moffatt	Beaver County, Canada	2019-01-29	Early detection is key.
Marie Bugg	London, Canada	2019-01-29	I ASKED for screening at age 40 but was denied!! By the time I was 41, I had Stage 4 Breast Cancer! I'm lucky to be alive!!! I don't want this to happen to others, other women with young children! Think of the future please 💎
Jenna Harris	Edmonton, Canada	2019-01-29	I have a dimple on my right breast. I had to fight for my mammogram to rule anything out because the ultrasound didn't pick up anything. Luckily my mammogram came back negative. I know i'm now more at risk in my future, but i can also now sleep at night knowing I don't have anything to worry about (right now).
Shirley Edwards	Summerstown, Canada	2019-01-29	I know from experience that screening is very important in early detection of breast cancers! I was screened in 2004 , my surgeon could not feel the lump it was that small ! I had a lumpectomy A biopsy showed to be cancer . I chose to have a to yoit did not have time to spread ! I chose a mastectomy rather than chemo or radiation . And have had no problems since! Early detction saved my life and the need of chemo and radiation. I received reconstruction Three years latter and am happy with the out come. In Ontario they only do screening every two years , I came from Quebec where they do it every year . If I had to wait two years between , the outcome could have been much worse! It may save the government money but our lives are worth more to us !
Nancy Oastler	Ottawa, Canada	2019-01-29	cancer does not age discriminate - women need to do self-examination and have mammograms - both these options saved my two sisters!!
Pat Pestell	Fort McMurray, AB, Canada	2019-01-29	I'm signing because more than half the people I know.... including men have had breast cancer.. some have been caught at early stage because of screening... others have been found too late... this is absolutely ridiculous.. think of the women that have fought it.. it's bad enough having to wait for test results and you are going to make them wait?? To see if it may have come back or not? Simple cruelty... in humane
Janet Vanderveen	Pontypool, Canada	2019-01-29	I have had inflammatory breast cancer (a cancer diagnosed at stage III or IV only) and advanced DCIS.Inflammatory Breast Cancer is an aggressive cancer and is becoming diagnosed more and more in young women. It is often misdiagnosed as a skin infection as it rarely forms a lump and affects the lymphatic system. A method of finding it at stage I or II has not been determined and it is so aggressive the delay in diagnosis often leads to it being diagnosed at stage IV. Experts are telling the new guidelines are a mistake and will cost lives, please listen.
Jane Saunders	Ladysmith, Canada	2019-01-29	Several friends wouldn't have found their breast cancer until it spread if this was the system

Name	Location	Date	Comment
Gail Beaudette	Longbow Lake, Ontario, Canada	2019-01-29	Gail Beaudette
Naomi Nelson	White Rock, Canada	2019-01-29	I was found on a mammogram to have a ductal carcinoma when I was 64.
Karen McKay Zoller	Saskatoon, Canada	2019-01-29	Too many lives at risk to cut back as ND entrench a wait an see attitudeGet the health accord back on track and allow affected persons th he proper care and screening!
Christal Yacke	Edson, Canada	2019-01-29	My mother had breast cancer and it's crazy this new recommendation
Joanne Wolf	Port Moody, Canada	2019-01-29	I'm wondering if anyone on the task force has had a close encounter with breast cancer? This new screening guideline tells me money is more important than lives. I was diagnosed at age 45, my doctor saved my life through screening. The women's movement takes a serious step backward here.
gorm dagoe	Coquitlam, Canada	2019-01-29	have had family member well under 49 who was diagnosed with breast cancer.
Karen Elliot	Quispamsis, Canada	2019-01-29	I am a woman with two daughters and a granddaughterthree generations that have to be sure of the oreventions we must take to get ahead of this terrible disease!!!!
linda burton	twillingate, nl, Canada	2019-01-29	I am a woman and in charge of MY health..
Bearcatdog Mueller	Saint Catharines, Canada	2019-01-29	Patriarchal government again denying women's health benefits
Audrey Ortwein	iroquois, Canada	2019-01-29	I have lost loved ones to cancer and I think we all need to be more cautious
Debra Whittaker	Mountain, Canada	2019-01-29	Debra Whittaker
Tina Jensen	Athabasca, Canada	2019-01-29	I was diagnosed at age 47 from a routine mammogram. Had I not had one until age 50 I would have been advanced into the disease.
Heidi Markham-Tonin	Hamilton, Canada	2019-01-29	I'm signing because guidelines need to be made according to science and stats.
Doris Hogaboam	Canada	2019-01-29	Doris Hogaboam
Michele Moger	Canada	2019-01-29	Women need prevention
Marie Harrison Harrison	Marmora, Canada	2019-01-29	For LI my friends whom have suffered this dreadful disease.
Carolyn Hetke	Kitchener, Canada	2019-01-29	I am a breast cancer survivor..cancer with no family history or predisposition. Breast cancer is an epidemic in North America and needs to be managed more closely...not less.

Name	Location	Date	Comment
Mike Karen Crellian	Canada	2019-01-29	I have had problems
Stephanie Witt	Lillooet, Canada	2019-01-29	Because friends and family have gone through this and it sucks.
Sarah Rosolen	Fort Smith, Canada	2019-01-29	We're going backwards here... early diagnosis is key to saving lives.
Mary Nightingale	Ottawa, Canada	2019-01-29	Women should not die because the research was flawed. Time to reassess breast screening guidelines.
Emilia Michaud	Ottawa, Canada	2019-01-29	I am signing because I believe in preventive screening and testing. This saves money and lives. I should be able to rely on guidelines not argue that they are not good enough. I also believe that doctors can use these as excuses not to recommend screening more often, if warranted.
Debbie McMillan	Parksville, British Columbia, Canada	2019-01-29	My mom died from stage 4 breast cancer. Early detection is key to saving lives!!
Velma Flann	Lillooet, Canada	2019-01-29	Being a breast cancer survivor, I am well aware of how important screening is and self exams.
J. Colleen BYERS	Brockville, Canada	2019-01-29	Breast cancer survivor
Lu-Anne Polnick	Belleville, Canada	2019-01-29	As a retired registered nurse I strongly feel that the new Breast Cancer screening guidelines are putting women's health at risk. I can't help but think that this would not be an issue if it were a men's health concern
Jean Helbrecht	Island Lake South, Alberta, Canada	2019-01-29	My daughter's breast cancer was determined very early because of mammogram in her 40s.
Barbara Elesko	Lillooet, Canada	2019-01-29	My mother died from breast cancer, and I live with the fear that I will get it one day.
Donn Glover	Ontario, Alabama, US	2019-01-29	Again, women are being sacrificed to save a few bucks, in my opinion! Disgusting!
Cheryl McCleary	Stittsville, Canada	2019-01-29	For all the women!
Lu-Anne Polnick	Belleville, Canada	2019-01-29	Please save lives, it could be your mother or your sister.
Jenn Bencharsky	Boyle, Canada	2019-01-29	I have many friends that wouldn't be here today if they hadn't been screened in their forties. Early detection saved their lives.
Victoria McDavid	Ottawa, Canada	2019-01-29	My Mother had breast cancer and my sister in law died from it. Too many women are dying needlessly.
Robert J. Dutcher	Canada	2019-01-29	I agree
Vicky Bond	Cardinal, Canada	2019-01-29	I value my life and every other female as well...
Tripta Sood	Toronto, Canada	2019-01-29	I believe in advocating for women's health.

Name	Location	Date	Comment
Cynthia K. DesGrosseilliers	Toronto,, Canada	2019-01-29	Facts are real. Policy creation should rely on latest, validated research.
Josh Elliott	North Bay, Canada	2019-01-30	Family history
Leslee Brown	Long Sault, Canada	2019-01-30	Everyone should be entitled to proper testing.
Yo D	ON, Canada	2019-01-30	Early detection will save lives.
Tracey Sinclair	Kitchener, Canada	2019-01-30	I was diagnosed at 48 with bc after 2 negative mammograms and ultrasounds. My doctor said 90% of women diagnosed DO NOT HAVE A FAMILY HISTORY.
Dean McCurdy	Iroquois, Canada	2019-01-30	Faye McCurdy
Susan Harvey	Phoenix, Arizona, US	2019-01-30	I am a breast cancer survivor, my niece is a two time survivor!
Robin Maxwell-Nunn	Kitchener, Canada	2019-01-30	I have dense breasts. Three years ago it was recommended on my screening results that I have yearly mammograms because of it. Now, its back to every two years. My sister who died of breast cancer at 62 years old also had dense breasts. She was diagnosed with stage 4 cancer at the time of discovery.
Amberlee Ficociello	Westbank, Canada	2019-01-30	I'm a survivor and these guidelines aren't going in the right direction!
Kim Mason	Stratford On, Canada	2019-01-30	I've lost 2 aunts to breast cancer. I should not have to beg for a test that could save my life.
Christine Dickson	Smiths Falls, Ontario, Canada	2019-01-30	I'm a woman, I have a daughter and women friends and I CARE. Our govt should as well.
Annette Goldenberg	Ottawa, Canada	2019-01-30	because every one can get breast cancer and screening helps find it fast.
Mary Brabazon	Mississauga, Canada	2019-01-30	So many women will die. Dont fo it
ThomasandTerry Lamb	Canada	2019-01-30	My daughter found a lump by self exam at age 33. She was then diagnosed with stage 4 breast cancer. She succumbed to this terrible disease at age 40. Too many young women are losing their lives to breast cancer. It is no longer just an older women's disease
Julia Hillier	Ridgeway, On, Canada	2019-01-30	We need a better early detection system.
susan lacasse	Hammond , ont, Canada	2019-01-30	there is a history in my family and no life should be lost over money
Eric Kalbfleisch	Canada	2019-01-30	These these new guidelines will cost lives and MUST be rejected.

Name	Location	Date	Comment
Patricia Steele	Ottawa, Canada	2019-01-30	I urge all of the women I know to sign this petition. Tell Health Minister Pettipas-Taylor and the Ford government not to wilfully increase loss of life in affected women.
Eileen Williams	Kitchener, Canada	2019-01-30	Because I am a breast cancer survivor
Karly Kayll	Edmonton, Canada	2019-01-30	Strong family history for breast cancer, not worth the risk to have something missed due to new guidelines
Lynne Babin	Ottawa, Canada	2019-01-30	Frequent and more thorough screening is needed
Cynthia McKeown	Canada	2019-01-30	My Mother died of cancer of the breast at a young age !These gudelines are not progressive at all !You need to give cited references and scientific evidence as to why these changes are necessary and who benefits these changes .
Nadia Legendre	Ottawa, Canada	2019-01-30	Because I'm a woman and care about my health and life!
Olga Bateman	Port Elgin NB, Canada	2019-01-30	I want lives to be spared by early and proper detection. I am a 22 year survivor.
Gail Workman	Airdrie, Canada	2019-01-30	I was diagnosed at 43 with breast cancer. A routine mammogram saved my life as I had no symptoms
Marzena Krygier	Oakville, Canada	2019-01-30	I'm BRACA positive and it's important cancer is diagnosed early!!! Early diagnostics saves lives!!!
Ann Stanton	Ottawa, Canada	2019-01-30	Two of my sisters found a lump in a mammogram. No lumps.
Audrey McNaughtan	Ottawa, Canada	2019-01-30	Breast cancer is preventable! It runs in my family.
Amy Yeomans	Merrickville, Ontario, Canada	2019-01-30	I'm 47 only been checked once
Martha Vowles	Grand Bay-Westfield, Canada	2019-01-30	The idea that these guidelines give women control of their own health care is ludicrous. We know perfectly well that the provinces will adopt these cavalier guidelines as a cost-saving measure and women will die as a result.
Heather Rose	NEPEAN, Ontario, Canada	2019-01-30	I'm a 46 year old woman
Karen McGinn Bouck	Edmonton, Canada	2019-01-30	I was diagnosed with breast cancer at 46 years of age only by mammogram. No palpable lump or family history of breast cancer. I am alive today because of it. 12 years later.
Andrea Roscoe	Canada	2019-01-30	Because breast cancer strikes younger and younger and it's not always found with a lump. A squish can save a life
Marianne Weeks	Ottawa, Canada	2019-01-30	I've had breast cancer and chemotherapy/ radiation...if early screening was available they might have caught it sooner. I suffer from many chronic conditions as a result of heavy treatment.

Name	Location	Date	Comment
Michelle Johnston	Ajax, Canada	2019-01-30	I was diagnosed with a rare and aggressive form of breast cancer and because of the screening procedures I believe my life was saved.
Leigh Carroll	Canada	2019-01-30	I had breast cancer. I have a daughter younger than 30, and sisters who must have annual screening.
Shelley Smith	Hamilton, Canada	2019-01-30	My stepdaughter had breast cancer in her early 40's. Without a mammogram she may have died.
Estelle Keeler	Coquitlam, Canada	2019-01-30	Screening saves lives!
Diane Spenrath	Edmonton, Canada	2019-01-30	I have had too many friends diagnosed with breast cancer.
Bertha Lamont	Lacombe, Canada	2019-01-30	Bertha Lamont
Tim Stephens	Coquitlam, Canada	2019-01-30	Too much cancer
Pam Vanderbraak	almonate, Canada	2019-01-30	I can't not sign this. Seriously.....
Heather Smith	Ottawa, Canada	2019-01-30	I am a woman and I have breasts. That should be reason enough.
Michele Krogh	Vernon, Canada	2019-01-30	My aunt was 41 when she was was diagnosed. Early screening is important.
Cheryl Noll	Ottawa, Canada	2019-01-30	I fall into the old `high risk` screening guidelines and do NOT want to see my current screening reduced.
Christina Merpaw	Ottawa, Canada	2019-01-30	I know people who were diagnosed with breast cancer in their 30s and 40s. If these guidelines were followed then, they would be dead now.
Diane Trenouth	Ottawa, Canada	2019-01-30	It's obvious these guidelines are not in the best interest of women's health
Ghislaine Daze	Ottawa, Canada	2019-01-30	I was diagnosed with a very aggressive breast cancer when I was 45 years old, as a direct result of a mammogram. My daughter was 13 years old and needed her mom. With the new guidelines, I would not have been there for her.
Elizabeth Hare	Nepean, Canada	2019-01-30	I'm signing on behalf of a good friend who would have died without an MRI (for her shoulder) which found her dense breast cancer.
Pauline Gibeau	Ottawa, Canada	2019-01-30	Because this is wrong. We need more support. Not less . I am one of those women with dense breasts and their is a history of breast cancer in my family.
Heather Connors	Vankleek Hill, Canada	2019-01-30	It saddens me that these new guidelines are not in the best interest of women!!
Margaret Blue	Edmonton, Canada	2019-01-30	My many friends are alive solely because of the old guidelines. My children's friends will be dead if the new guidelines stay in effect.
Dense Breasts Canada	Toronto, Canada	2019-01-30	We are very sorry for your loss.

Name	Location	Date	Comment
Sherry Waddle	Spruce Grove, Canada	2019-01-30	I found my cancer myself with self examination !!! I was in my 40's.
Emilie Bellefontaine	Mineville, Canada	2019-01-30	All canadian women deserve the best care possible to help save lives. We all know someone or have lost someone to this terrible disease
Doreen MacLachlan	Kemptville, Canada	2019-01-30	I have lost relatives to breast cancer
Shelley McMillen	Oakville, Canada	2019-01-30	I was diagnosed with DCIS at age 43.
Melanie Warren	Morrisburg, Canada	2019-01-30	My maternal Grandma has a radical mastectomy when she was in her late 50s, early 60s. Seems to have slipped my mother's generation and I'm just praying it will skip mine. Without early screening and detection, my life could be at risk.
Berkley Reid	Halifax, Canada	2019-01-30	This is mywife's aunt who i care about and i am in support of this action, to support all who is against this.
Lindsay Simpson	Oshawa, Canada	2019-01-30	We deserve early screening. No more lives should be lost to this disease!
Claudia Houle	Ottawa, Canada	2019-01-30	I am a nurse and saw how many of my patients , and even close friends have a successful treatment y great prognosis for early diagnose with screening. Please be aware of the benefits, we need it, it is an investment not a health care extra expense/ time wasted that can be cut . It save lives.
Janice Smith	Iroquois, Canada	2019-01-30	Friend who lost her sister anduMother
Marilyn Hartley	Centreville, Canada	2019-01-30	Marilyn Hartley
Rebecca Smith	Russell, Canada	2019-01-30	I know too many women who have had breast cancer, and who might not be here today if the screening wasn't up to date and available.
Patricia Friedland	Toronto, Canada	2019-01-30	Early detection is vital to survival. I know from experience.
Karen Passmore	Kincardine, Canada	2019-01-30	Early detection is so important!
Mary Loveless	Ottawa, Canada	2019-01-30	Please change the guidelines! It will save lives. Breast screening needs to begin in our 40's and be done yearly.
Jennifer O'Grady	Kemptville, Canada	2019-01-30	My mom ##
Elizabeth Clarke	Ottawa, Canada	2019-01-30	Our lives matter
Sue Babin	Munster, Canada	2019-01-30	My sister-in-law Nicky## and all young women and men who have been diagnosed before 40
Harriet Altman	Toronto, Canada	2019-01-30	I have had breast caner and I have a daughter and granddaughters and I want them to have the Best Possible Health Care that Ontario can provide.

Name	Location	Date	Comment
Diane Loiselle	Welland, Canada	2019-01-30	Among many of her illnesses, my older sister had breast cancer as well. I firmly believe that breastfeeding cancer screenings are very important for females as well as male. Preventative medicine is crucial in every country's health system. Good guidelines to follow as well as regular updates to these guidelines are as well.
Marion Lorden	Woodlawn, Canada	2019-01-30	Screening saved my life, specifically a mammogram. Let's keep saving them.
Lorraine Huggard	Ottawa, Canada	2019-01-30	If these guidelines are followed many women will die. I met a young woman at the cancer centre who had 4 kids and was being treated for breast cancer. We were discussing these guidelines. Its a disgrace. Her cancer was caught early; eighbthese guidelines it may not have.
Brenda Sheehan	Kars, Canada	2019-01-30	I have dense breasts and was diagnosed with breast cancer in 2015 luckily it was found by my routine mammogram that I had every 2 years.
Ianora Reid	Ottawa, Canada	2019-01-30	My sister had breast cancer
Sharon Villeneuve	Ottawa, Canada	2019-01-30	Sharon Villeneuve's, Ottawa, Ont
Angie Katjatak	Edmonton, Canada	2019-01-30	Early detection is very important!
Natalie Barre	Airdrie, Canada	2019-01-30	I was diagnosed with breast cancer at 31.
Teresa Chianelli	Toronto, Canada	2019-01-30	Demand the Health Care System Ohio to cover Thermography which has no radiation or breast compression involved. Mammograms should be eliminated completely from the Health Care system, the procedure subjects patients to pain and radiation exposure and stimulates cancer growth and supports metastasis.
sommer boudreau	Deep River, Canada	2019-01-30	i was diagnosed with stage 3 aggressive breast cancer at 33. getting checked literally saved my life! these guidelines are ridiculous
David Cousineau	Carleton Place, Canada	2019-01-30	It is important to save lives no matter the age.
Dawn Jaques	Brantford, Canada	2019-01-30	My mom had breast cancer. So important for proper screening!
Susan Leclerc	Ottawa, Canada	2019-01-30	Canadian women, and men, should have the best medical care available.
Lynn Albert	Guelph, Canada	2019-01-30	I am signing because my mom had breast cancer and my best friends mom had breast cancer
Tracy Wondrasek	Ottawa, Canada	2019-01-30	I am over 50 with lumps
Robert Millican	Ottawa, Canada	2019-01-30	I care
Marilyn McIntosh	Morrisburg, Canada	2019-01-30	This new guide is dangerous and not accurate.

Name	Location	Date	Comment
Andrea Paquette	Niagara Falls, Canada	2019-01-30	I believe in early detection of breast cancer!
Shiela Wionzek	Brampton, Canada	2019-01-30	No woman should die from breast cancer that could have been found early.
Debi Marshall	Ottawa, Canada	2019-01-30	We need to save lives not put them at risk.
Rachelle Wallage	Toronto, Canada	2019-01-30	If I abided by these recommendations I would be dead now. I found my breast cancer by self exam, as many women do, and by the time it had been diagnosed via mammogram and biopsy, it had spread to my lymph nodes. I was 43. At the time I had no idea that it would be genetically related.
Gayathri Krishnaswamy	Mississauga, Canada	2019-01-30	Healthcare of all needs rapid upgrades in its screening protocol.
Paige Balicki	Canada	2019-01-30	this needs to be stopped before it's to late!
Diane Schmidt	Regina, Canada	2019-01-30	Its the right thing to do.
France Barbeau	Ottawa, Canada	2019-01-30	I have breast cancer and I'm 38!
Chera Cole	Glance Bay, Canada	2019-01-30	My mother has breast cancer and they wouldn't have found hers without a mammogram since it was a type that couldn't be palpated. I signed because I believe screening and saving lives is more important than saving the government money, which is all the new recommendations are good for!
Valerie St-Onge	Casselman, Canada	2019-01-30	I've has 2 family members with breast cancer and its extremely important no matter my age to be able to get screened !
Jean-François chabot	Gatineau, Canada	2019-01-30	Its the right thing to Do
Marisa Love	Gander, Canada	2019-01-30	My stage 2 breast cancer would have been missed if these guidelines are followed. These recommendations are irresponsible and careless
Jane Meneilley	Belleville, Ontario, Canada	2019-01-30	I was diagnosed with stage 3 breast cancer at 47. I found the lump but may have disregarded it had it not been drilled into me to always self check and be wary. I have a mammogram every year now. Wouldn't miss it for anything. I get the risks. I'll take it. Better than already dead.
Hélène Choliva	Laval, Canada	2019-01-30	Hélène Choliva
Ginette Beauchamp	Rockland, Canada	2019-01-30	Please sign the petition and get screened!!
Lori Hewson	Metcalfe, Canada	2019-01-30	My mother and her mother both had breast cancer before age 55. We are extremely lucky they both survived it because it was caught in time
Lynn Caldwell	Halifax, Canada	2019-01-30	I'm signing because I was diagnosed with lobular carcinoma Aug,2018. I get yearly mammograms because I have a gene mutation. Dr. says I would not have found this on my own.

Name	Location	Date	Comment
Mary Rudderham	Sydney, Canada	2019-01-30	Breast cancer has no age and it should be checked at any age... if you have paps at 16 or when sexually active so should breast screening
Sandy Cairns	Rockland, Canada	2019-01-30	Through self examination I found a lump at age 43. I had no family history of breast cancer, and because I had no family history of breast cancer my physician advised against having a mammogram until I turned 50. I was diagnosed with stage 3b aggressive breast cancer resulting in six months of chemotherapy that did not work, a full mastectomy, and 25 rounds of radiation...and, yes, dense breast tissue. All this probably would not have happened if screening had started at 40 with or without a history of breast cancer in the family.I strongly encourage the powers that be to re-think their breast screening policy which will only serve to save lives.
June & El evans	Manitoba, Canada	2019-01-30	'This is just ridiculous how much they are just ignoring us and putting our lives at risk 💎
Laurie Osburn	Norton, Canada	2019-01-30	I am almost 60 and at high risk genetically
Ines Hernandez	Toronto, Canada	2019-01-30	Prevention and early detection are critical to prevent cancer toll. Unfortunately screening guidelines in Canada for Colon Cancer, Uterus Cancer and Breast Cancer are absolutely inadequate to prevent or catch up in early stages!
Terence Roberts	Parksville, BC, Canada	2019-01-30	I am Jennifer Roberts and I am signing because my Mother and grandmother had breast cancer, as well as my young cousin(39) and 2 of my cousins daughters(early 40s) had cancers that were detected by early screening. I will be ensuring that my daughters do this at 40!
stephanie thatcher	Orillia, Canada	2019-01-30	My friend has breast cancer and she's 32 years old. My grandmother who is 90 was also just diagnosed. There should be no limit on the age for screening and tests. I know of women under the age of 30 who have gone through breast cancer. With the raise of cancer in younger women this just doesn't make any sense to do!
Elizabeth Harrison	McGregor, Canada	2019-01-30	I am a cancer survivor and I want every woman who can be saved to be SAVED!!
Cindy Rice	North Bay, Canada	2019-01-30	My sister was diagnosed with breast cancer during her early 40's. Screening is absolutely necessary.
Tracey Wright	Havelock, Ontario, Canada	2019-01-30	I'm 52yrs old just had a mammogram and need to keep going every 6mths first the next 2 years for monitoring Calcification. So please tell me it's not important for woman my age to not have yearly screening.
Amy Howson	Essex, Canada	2019-01-30	I am signing because I have daughters and nieces who need to grow up in a world without breast cancer!
Sharon Parish	Essex, Canada	2019-01-30	This is not adequate for what is known to be needed for early detection.
Margaret Stegner	Waterloo, Canada	2019-01-30	Please revise before lives are lost. Getting MAD.

Name	Location	Date	Comment
Heather Logan	Essex, ON, Canada	2019-01-30	I have lost many I love to this disease.
Karen Wright	Huntsville, Canada	2019-01-30	This recommended change is outrageous. You need to listen to the users of the system & in my opinion a task force that is qualified to make an recommendations.
Donna Wallace	Windsor, Canada	2019-01-30	I'm a breast cancer survivor....we need to take preventative measures!! Educate our children in health classes!!
Julie Charbonneau	Montreal, Canada	2019-01-30	I know too many people who have had breast cancer before the age of 40. This guideline makes it harder for people like me, get my doctor to take me seriously when I say I want a yearly mammogram.
JoAnne Belanger	Ottawa, Canada	2019-01-30	I know a few women with breast cancer and totally support this initiative, otherwise it will be difficult for women to ask/demand a yearly mammogram, and if refused their lives will be in danger.
JoAnne Belanger	Ottawa, Canada	2019-01-30	And by the way i am also a breast cancer survivor thanks to early detection.
Maureen Beecroft	Stratford, Canada	2019-01-30	Obviously the psychological benefits of those "unnecessary" biopsies are not being taken into account when a large lump is found. After three or four biopsies over the years, which never bothered me as unnecessary, a definite positive was found. Waiting and watching was given as an option, but not what I could do emotionally. Get rid of it!!! I have had two mastectomies, but am now being told by so called experts that these are mutilations and I should have had breast reconstruction. My value as a woman is not tied to my breasts. Experts need to talk to and listen to the woman involved. My body, my decisions. Too many younger women will be at risk with these guidelines, especially those with dense breast tissue. Breast screening is not comfortable, but neither are PAP tests, both save lives.
Patricia Hiebert	Orleans, Canada	2019-01-30	I was diagnosed at 48 years old. The lump was hidden and only found by routine mammogram.
Anoinette Ritacco	Sault Ste. Marie, Canada	2019-01-30	We have a government which spends our tax dollars on Illegal Migrants and Terrorist countries. We hard working Canadians who are demanding OUR hard earned money spent on the wellbeing of CANADIANS and the HEALTH of CANADIANS!
Marilyn Stawecki	London, Canada	2019-01-30	I believe in screening and saving as many lives as possible....no exceptions!
Ashley Kerr	Victoria Harbour, Canada	2019-01-30	Women's cancer runs in the family. Sometimes you have to beg your doctor to do more tests.
Bonnie Jackson	Prince George, Canada	2019-01-30	I am concerned for all the women without doctors to discuss this with. Give the mammograms!!! False positive just means you get it checked out further, great, no worries.
NANCY MORRIS	Belle River, Canada	2019-01-30	Because I have dense breasts and want proper screening and believe the experts over just doctors.

Name	Location	Date	Comment
Myrna McNaughtan	Ottawa, Canada	2019-01-30	I was diagnosed in my 50s. And it was reactive because I felt something - not proactive because I'd hit a crucial age marker. I'd rather be anxious than dead.
Lisa MacLean	Dartmouth, Canada	2019-01-30	I want to be here for my children!
Linda Foulds	Corner Brook NL, Canada	2019-01-30	I'm sure some of these changes are due to cutbacks. How sad.
Rita Nattkemper	Ottawa, Canada	2019-01-30	I was diagnosed with breast cancer after a routine mammogram done July 2017. I was lucky. I had my biopsy in August and surgery in September. I am considered in remission and relieved that I can continue to enjoy life. Because I have dense breasts my tumor wasn't felt. As a precaution they also re-tested my other breast and did a biopsy on it. I don't believe that governments should limit or reduce access for women to have diagnostic testing that can save lives.
Deanna Stad	Maple Ridge, Canada	2019-01-30	My mother was 31 years old when diagnosed. She would be DEAD if this was in place then (1980s). We know better now. This is going backward!
Jennifer Wenzel	Kelowna, Canada	2019-01-30	Saving lives is infinitely more important than saving money. Think about your mothers, your wives and your daughters. Surely they should matter more.
Jennifer Campbell	Amherstburg, Canada	2019-01-30	I am a breast cancer survivor and demand appropriate screening and care!
Sabrina Bailey	Humboldt, Canada	2019-01-30	The new guidelines are reckless and dismissive.
Linda Nuttall	Tiny, Ontario, Canada	2019-01-30	My grandmother died from breast cancer and my sister also died from breast cancer as she didn't get the screening done as often as was necessary.
Dodie Costain	Kamloops, Canada	2019-01-30	This is so wrong,
Karen Brown	Bradford, Canada	2019-01-30	I'm signing for my friend who was diagnosed at 32 and for the future of my daughter and every woman!
Colette Langdon	Barrie, Canada	2019-01-30	If these guidelines stay in place women like me will go undiagnosed. Cancer doesn't see age and women are developing breast cancer in their 20's, 30's and 40's. My grandmother was diagnosed at 36, she would have died if these regulations were in place back then.
Tammy Lariviere	Dawson Creek, Canada	2019-01-30	These guidelines must be reconsidered
Katherine Sicard	Ottawa, Canada	2019-01-30	I have relied on mammograms and ultra sound to STOP my anxiety from dense fibrocystic breasts.
Ariana Lecorps	Medicine Hat, Canada	2019-01-30	I am outraged hearing the news of these guidelines. Why is women's health being dismissed this way? Cancer screening should be getting more extensive not less. This is careless and many will die when it could have been prevented.

Name	Location	Date	Comment
Erin Sheehan Powell	Ottawa, Canada	2019-01-30	I am one who has dense breasts, I am one who has had biopsy, I am one who is a participant in the study promoting the use of tomosynthesis for dense breasts. Please don't take these lifesaving screening practices away from us, early detection means early cure!
Shannon Beaumont	Lasalle, Ontario, Canada	2019-01-30	I was diagnosed with Triple Negative Breast Cancer at age 44; and am still going through active treatment. The Stage 2 lump was found through a routine mammogram. If the new guidelines were followed, it would not have been found until it was too late. These guidelines are misguided!
Patty Gravelle	Renfrew, Canada	2019-01-30	I was first diagnosed with aggressive breast cancer at the age of 41, found on routine mammogram I was diagnosed again at 43, found doing routine self exam. Young women deserve to grow old!! Please change these recommendations.
Jen Kapinya	Kingsville, Canada	2019-01-30	I am a breast cancer survivor. I was 46 when diagnosed. I have dense breasts and no immediate family history. A lot of the women I met on my cancer journey were younger than me. Where do you get your statistics from?!?
Heather Young	Barrie, Canada	2019-01-30	Screening isn't a, one standard fits all scenerio.
Nadia Hillier	Dartmouth, Nova Scotia, Canada	2019-01-30	I'm 37 years old, live in Nova Scotia and can't get a breast exam even though I've asked my family doctor. I'm currently living with a reoccurrence of stage 3 Ovarian cancer and also have a family history of breast cancer.
Allie Burtch	Halifax, Nova Scotia, Canada	2019-01-30	For all Canadian women
Kathi McCredie	Niagara Falls, Canada	2019-01-30	My mother and aunt were both diagnosed with a rare form of genetic aggressive breast cancer and my sister needs to be screened and watched sooner so we can prevent it
Connor Duncan	Glasgow, Scotland, UK	2019-01-30	honestly, what the HELL does the Canadian government and medical teams think they are doing?, this makes me think two things, one: they don't trust women with self-care regardless how well they understand themselves, 2: they are trying to sponge off of these poor women, furthermore making me think that they are unlawfully disempowering women among the public all over Canada.
Michelle Burgess	renfrew, Canada	2019-01-30	We need to be proactive with our healthcare not reactive. Many lives are saved with screenings at an earlier age
nicole turnbull	newglaSGOW, Canada	2019-01-30	my mother has breast cancer
Margaret Johnston	London, Canada	2019-01-30	My Mum was a breast cancer survivor and it's possible I will have to battle this myself but I won't know early enough to do so if this is implimented.
Jennifer Downie-Christiansen	Wheatley, Canada	2019-01-30	I have been monitored since 2000 because of dense breasts & cysts plus my mother is a breast cancer survivor!

Name	Location	Date	Comment
Rachel Hall	Dorchester, Canada	2019-01-30	It's not only older women who get breast cancer, and this will affect lives.
Gale Degner	Stoney Creek, ON, Canada	2019-01-30	My mother died from undiagnosed breast cancer.
Tracy Delooze	Stratford, Canada	2019-01-30	I was diagnosed with breast cancer from a lump I found from self-exam. I was 32 years old.
Belle Nicholson	Dartmouth, Canada	2019-01-30	Belle Nicholson
Ryan Thomason	Northville, Michigan, US	2019-01-30	A friend of mine discovered a lump in her breast with a self exam (which is apparently not recommended for some reason?). She wasn't due for a mammogram for another 10 years. As it was, she barely discovered it in time. Please revise the guidelines. It is literally a matter of life and death.
Sandy King	St. John's, Canada	2019-01-30	Please explain to me how a theres called specialist can determine a person does not have breast cancer by looking or by feeling in a breast ? Really ? Please I'm not a rocket scientist but do you actually think believe will believe this new research ?! So if the limols the size of the top of a pin they are going to detect it this way ? Please . Signing this petition . Sandy King
Dianne Lynch	Montréal, Canada	2019-01-30	I went to my Dr. for a sinus infection and while reviewing my charts she insisted that I have a mammogram! I had cancerous cells, but it was caught early and a lumpectomy and radiation was the worst of it. If I hadn't gotten that screening then, who knows how far along it would have gotten, and what I would've had to go through!!! That was 3 years ago, and still cancer free! I am all about early detection!!
Jennifer Lefevre	Barrie, Canada	2019-01-30	I was 37 when diagnosed with breast cancer and no family history. Had I not found the tumour myself I don't know if I would be here signing this petition today
Krista Rhodes	Newport, Canada	2019-01-30	Women Deserve health care at its best
Kerry Tench	ST margarets BAY, Nova Scotia, Canada	2019-01-30	This is so important!
Judith Barker	Alliston, Canada	2019-01-30	These guidelines are reckless. I wonder what the hidden agenda is.
Jaime Pineo	Nova Scotia, Canada	2019-01-30	I am a woman , I am a mother and I feel everyone should have a right to proper healthcare .
Leslie Bickle	Saint Catharines, Canada	2019-01-30	Early detection is the key for survival and all tools necessary for it should be available based on science not in finance.
Kristi Penney	Douglas, Canada	2019-01-30	I was diagnosed at 35 yrs old while breastfeeding my 7 month old. I had no family history and do not carry a know genetic mutation. My cancer had progressed to stage 3 with the only signs a lump I found on my own.

Name	Location	Date	Comment
Toni MacDonell	Summerstown, Canada	2019-01-30	The science says things need to change
Karen Thompson	Ottawa, Canada	2019-01-30	These new guidelines will cost lives. More women under 50 or younger are being diagnosed with breast cancer so why would you raise the age for mammograms. Early detection is key to saving lives.
Elizabeth Crosby	Richmond, Canada	2019-01-30	My mother had breast cancer. She survive it,because she caught it early and had reliable screening and tests.
Geoff Seymour	Ottawa, Canada	2019-01-30	The science is outdated and needs to be fixed
Madeleine Peters	New liskeard, Canada	2019-01-30	I believe the test could detect cancer. We need it.
wendy lyon	Ottawa, Canada	2019-01-30	Breast cancer is in my family. I want the best chance for me and my daughters.
Crystal Proulx	Kamloops, Canada	2019-01-30	I lost a loved one from breast cancer at age 40. Screening should be done sooner not later!
Justina Crocker	Edmonton, Canada	2019-01-30	I believe the screening should start at a younger age
Sharron Tuckey	Ottawa, Canada	2019-01-31	My sister died from breast cancer at the young age of 36 (diagnosed with breast cancer at age 34). Your age does not exempt you from breast cancer!
Theresa Gobeil	Saint Catharines, Canada	2019-01-31	I was diagnosed at the young age of 33. I have no family history, I found the lump on my own. My mammogram said nothing was there but the ultrasound did. The biopsy confirmed it was Triple Negative Breast Cancer. Testing needs to be done sooner rather than later. Breast Cancer doesn't just effect women in their 40's and 50's
Ingrid Oliver	Havelock, Canada	2019-01-31	I have children, and would like to meet my grandchildren.
Ruth Ferriss	Barrie, Canada	2019-01-31	I've been monitored for years, every 2 years, then last mammogram.....dense breasts so now once a year mammagrams. I'm 57 years old. I want to know I stay cancer free and if not...I want to know very early on and beat it!
Harj Kooner	Richmond, Canada	2019-01-31	Women's health issues have been under represented and over looked for too long. The medical system needs a systematic review and subsequent amendments.
Nicole Gillingwater	Barrie, Canada	2019-01-31	Quit trying to save money at the cost of lives!
Cathy Pryde	Barrie, Canada	2019-01-31	We need to take a stand against bureaucracy people's lives matter more than saving a few dollars here and there. My sister and good a friend recently went through this devastating disease breast cancer. If you are not satisfied with your mammogram results insist on ultra sound. Mammograms are not always accurate.
Gloria Corona	Edmonton, Canada	2019-01-31	Is better to prevent that to regret!

Name	Location	Date	Comment
Eileen Hughes	Prince George, B.C., British Columbia, Canada	2019-01-31	Of course I am signing this very important message and trust that Gwen will receive what is so much needed.
Bruce Lake	North York, Canada	2019-01-31	It's the right thing to do.
Shari-Lyn Doubleday	Ottawa, Canada	2019-01-31	Early detection is key! What are they thinking!!
shannon hall	Stittsville, Canada	2019-01-31	Waiting until woman are almost 50 is unacceptable. Mama grams are only partially effective we need better care & detection technology
Betty walker	strathroy, Canada	2019-01-31	I have had cancer which was caught early
Patricia Whealy	Newcastle, Canada	2019-01-31	Friends and family members have been diagnosed with breast cancer. We need all the tests we can get.
Monica Totten	Ruthven, ON, Canada	2019-01-31	Breast cancer runs in my family and I do not wish to join this club.
Shirley Maki	Brockville, Canada	2019-01-31	I am signing because 2 of 5 women in my family have had successful treatment of breast cancer due to early diagnosis. Very important to be examined.
Katherine van de Leur	CALGARY, Canada	2019-01-31	Mother had stage 4 breast cancer at 38 and was found by screening.
Janet Mayo	Nepean, Canada	2019-01-31	Breasts feed babies.
Peggy Matheson	Whitby, Ontario, Canada	2019-01-31	I've had breast cancer and know too many others. We need updated guidelines.
Carrie Gravel	Osggode, Canada	2019-01-31	Carrie Gravel
Edie Fearon-Meikle	Sherwood Park, Canada	2019-01-31	I don't agree with the new guidelines and women over 40 are at risk just as much as younger women.
Karen Irvine	Barrie, Ontario, Canada	2019-01-31	Screening saves lives
Laurie Krempien-Hall	Stratford, Canada	2019-01-31	this is important and we all need to listen
Nadia Warren	Ottawa, Canada	2019-01-31	I'm signing because now woman have to literally fight to survive. This will be a death sentence to some.
Rosanna Pickford	St. Catharines, Canada	2019-01-31	We need the best information available to make the best decisions for our health!
Humeyra Cimen	Toronto, Ontario, Canada	2019-01-31	I had a mammogram every year until I was told to come back in two years according to the regulations. Two years later I was diagnosed with end of stage two breast cancer. It should be done yearly.
Robin Martin	Amherstburg, Canada	2019-01-31	I'm a triple negative breast cancer survivor. I was 46 when I found the lump. A mammogram confirmed it. I have dense breasts. Please , we must do away with these old ways, and use the knowledge we

Name	Location	Date	Comment
			now have to formulate better timelines and practices to save more lives.
Susan Edwards	Victoria, Canada	2019-01-31	I am a family physician, breast cancer survivor (diagnosed at age 42 on mammography), and mother of two daughters.
Heather Brohm	George Town, Cayman Islands	2019-01-31	Women need to come together & fight this or a lot more lives could be lost unnecessarily.
Gail Chevrier	sudbury, Canada	2019-01-31	I am signing this because I do not agree with the breast cancer screening guidelines
Lisa Simmons	Maple Ridge, Canada	2019-01-31	If they are advising against self examination AND withholding the mamagram until 50 plus years they are wrong and don't know what the hell they are talking about.
Kerri Ostapchuk	Canada	2019-01-31	I have breast cancer in my family.
Wendy Wasserman	Angus, Canada	2019-01-31	I care about womens health
Amy McInnis	Leamington, Canada	2019-01-31	I lost a family member to breast cancer - she was 43 years old.
Stephanie St. Denis	Windsor, Ontario, Canada	2019-01-31	We need better screening!!
Jan Kellar	Toronto, Canada	2019-01-31	I'm probably alive today because I did BSE regularly from my 20's. Found a malignant tumour in my 40's ! Change to recommendations to reflect reality!
Janet Amiel-Sorgini	Bradford, Canada	2019-01-31	I have had great cancer twice now.. Once at 28 and once at 43.. Catching it early due to screening and self check is huge. I can't believe you want to take this away.
Kim Stirling	Spruce Grove, Canada	2019-01-31	I am a 2 time breast cancer survivor: first round at age 33, second round at age 45. Without effective screening, I would be dead. Please listen to the medical experts and ensure women have access to regular, early detection screening.
Elaine Hill	Morrisburg, Canada	2019-01-31	Today, more women 50 and under are being diagnosed with breast cancer. Why would you raise the age for mammograms? Early detection is key to saving lives. These new guidelines will cost lives.
Rob Gibson	Unley, Australia	2019-01-31	I am signing because my Friend Raquel wakes me to fight for justice
lyle elder	montreal quebec, Canada	2019-01-31	This panel is obviously male doctors and number crunching. I am madthey are looking at costs and not lives saved.
Constantina Stavrinou	Markham, Canada	2019-01-31	My mother had a mastectomy
Kathryn McKeown	Edwards, Canada	2019-01-31	I just survived breast cancer after treatment and have dense breasts but never knew until I did until the diagnosis.
Kathryn McKeown	Edwards, Canada	2019-01-31	I just survived breast cancer after treatment and have dense breasts but never knew until I did until the diagnosis.

Name	Location	Date	Comment
Corinne Attagutsiak	Iqaluit, Canada	2019-01-31	For Colleen.
Tina Hasfjord	Lumsden, Canada	2019-01-31	Really? The average?
Marilyn Miller	Hamilton, Canada	2019-01-31	No woman or family should have to suffer
susan romaniuk	magnetawan, Canada	2019-01-31	if we are going to spend the money to do the screenings, as i believe we need to, then let's at least make the screening effective!
Laurie Pinhey	Canada	2019-01-31	Breast cancer runs in my family.
Kari Hentzelt	penticton, Canada	2019-01-31	Another bullet to the heart for womens' health care in Canada. :(
Starla Groombridge	Dartmouth, Canada	2019-01-31	Early detection saves lives 💎
Marg Buckholtz	Kingston, Canada	2019-01-31	This is vital for women's health!
Sue Byers	Mitchell, Canada	2019-01-31	Sue Byers
Sue Byers	Mitchell, Canada	2019-01-31	Any prevention of Breast cancer can only help women. The earlier it is detected the better, Why wouldn't the Government get behind this, it just doesn't make sense to make these changes especially for women to stop doing Breast examinations. This is just not right. We want to stop Cancer early so it can have a chance to be cured.
Chantal Hunter	Orleans, Canada	2019-01-31	My mom past away from breast cancer.
Jennifer Wheeler	Perth, Canada	2019-01-31	My mom, aunts, and numerous friends and family have faced breast cancer. Some have won and some have lost the fight. Everyone deserves proper screening.
Colleen Uruski	South Woodslee, Canada	2019-01-31	One to many friends dieing of breast cancer.
Rob Sullivan	Chesterville, Canada	2019-01-31	Early detection is surely the best option. My Mom had breast cancer when she was 55 and because of routine Mammograms it was caught in the early stages and I'm lucky to have my Mom with me to this day
Jana tiessen	Essex, Canada	2019-01-31	I believe we should not "cut back" in our healthcare, screening and testing. I believe that we have the knowledge to test for cancer, we should use it no matter what the history is. Save a life...that is what matters. Stop peoples suffering.
Deborah moore	Victoria, Canada	2019-01-31	I know too many young women who have been diagnosed with breast cancer too late.
Louise Martens	Windsor, Canada	2019-01-31	I was diagnosed by age 48. A self exam and then confirmation by physicians.
Maureen McCartney	Winnipeg, Canada	2019-01-31	I listened to White Coat Black Art on CBC radio and heard a woman's story about how her diagnosis of CA. was missed because of dense breast tissue

Name	Location	Date	Comment
Laura Powell	Toronto, Canada	2019-01-31	It feels like these new guidelines want women to stick their heads in the sand and pretend that breast cancer isn't a thing that can happen to them and if it turns out it does, at least the women without breast cancer didn't have to go through a few routine checks. Are they going to recommend doing away with PAP tests next because they're uncomfortable and a lot of women only ever have regular tests anyway and sometimes even an abnormal result is nothing? Just another example of women being told they aren't worth the time and effort to take care of properly.
Elizabeth Ruppel	Kelowna, Canada	2019-01-31	I am a breast cancer survivor x17 years. Found lump through self exam...stage 4! Thermography is possible option for those not wanting mammogram.
Sharon Akrey	Chatham, Canada	2019-01-31	No woman should die from breast cancer
Heidi King	Saint John, New Brunswick, Canada	2019-01-31	Because this is wrong!!!!!!
Priya Singh	Vancouver, Canada	2019-01-31	Breast cancer screening helps
Dana Lust	Georgetown, Canada	2019-01-31	Because I am a survivor. I was diagnosed at 41 from a routine first time mammogram. No lumps. No signs. No family history.
Robin Thomas	Leamington, Canada	2019-01-31	Robin Thomas
Jason Burry	Mispec, NB, Canada	2019-01-31	Heidi said so!
Maria BRODA	Edmonton, Canada	2019-01-31	Because we do not want women to die by using the old screening method.
Lena Noftall	Stephenville, Canada	2019-01-31	I was 78 when diagnosed.
Kim Stubberfield	Halton Hills, Canada	2019-01-31	I found my own lump at age 39. For two years I had annual mammograms and ultrasounds that detected no cancer due to dense breasts...I was told it was just a cyst. In 2017 at age 41, the lump changed and those tests still indicated just a cyst. I asked if cysts were hard like mine (they are not) and that is when I was given a biopsy and diagnosed with breast cancer. Again mammogram and ultrasound were given and no sign of cancer on imaging. An MRI was finally ordered and that is when my tumour could finally be seen.
Beverley Murray	Brockville, Canada	2019-01-31	This is an important issue!!
Sharon Clarkson	Edmonton, Canada	2019-01-31	The new guidelines are counterproductive and dangerous. Many could die under the new guidelines!
Linda Morkem	Bath, Canada	2019-01-31	P
Cheryl Kelly	Oshawa, Canada	2019-01-31	I was just diagnosed with Breast Cancer because of a mammogram.

Name	Location	Date	Comment
Helen Davis-Mullin	DARTMOUTH, Canada	2019-01-31	it's extremely important!
Linda Cass-Jones	Lake Barron, QC, Canada	2019-01-31	As a breast cancer survivor, I cannot advocate strongly enough for guidelines based on the most up to date and accurate research.
Caity O'Neill	Canada	2019-01-31	Women's health needs to be taken seriously!
Jennifer Chenier	Ottawa, Canada	2019-01-31	This is a disgrace!
Ken Anderson	Ottawa, Canada	2019-01-31	Experts agree, the new guidelines are flawed.
Kate Partridge	Ottawa, Canada	2019-02-01	Early screening in my early 40s, thanks to my progressive Dr who agreed to send me for a baseline mammogram, saved my life and my son has a mom today as a result. Signing in hope that public health policies evolve to truly serve women's health.
Bev Timpson	Ottawa, Canada	2019-02-01	Important for early detection based on the medical studies already donem
Stephanie Cavanagh	Coleman, Canada	2019-02-01	I am signining because I have had two Aunties who were diagnosed with breast cancer at a fairly young age, and one of those aunties passed away from it.
W Fermo	Innisfil, Canada	2019-02-01	I have had breast cancer. I know how important mammograms are.
Heather Urquhart	Toronto, Ontario, Canada	2019-02-01	I know too many women who have had breast cancer in their 40s.
Lorraine Gravelle	Canada	2019-02-01	Lorraine Gravelle
Esther Chetner	Vancouver, Canada	2019-02-01	Women with dense breasts should be given the chance to get properly screened. We are entitled to healthy, well-researched precautions!
Louise Miller	Ste martine, Canada	2019-02-01	P
Sherry Laporte	Nepean, Canada	2019-02-01	I'm signing.
Sandra Riopelle	Canada	2019-02-01	I was diagnosed at 47 with aggressive ductal carcinoma and who knows if I would be here today if I didn't have a mammogram before the age of 50
lucie beaulne	Clarence-Rockland, Canada	2019-02-01	I know women who had breast cancer if they had early screening they might not have to die also my friend had lung cancer and if there had been communication between doctors they could of done something fore him as it was hat didn't happen and he died
Michael Linver	Albuquerque, New Mexico, US	2019-02-01	Women do not need to die needlessly from breast cancer, when the evidence is so clear that early detection through yearly screening with mammography beginning at age 40 finds breast cancer when it can be cured!!

Name	Location	Date	Comment
Kathy Taylor	Sarnia, Canada	2019-02-01	I'm signing this petition as a breast cancer survivor...I was not sick...I had no lumps...just a young new doctor who asked me my age...I was 50...she sent me for a routine mammogram...they called me the next day...I HAD CANCER!STAGE 2 B....without that mammogram I would likely be close to death today.Instead I'm almost 5 years clear...this was only my second mammogram in my life...3 years before my cancer diagnosis....the first one was clear.These new guidelines will make breast cancer statistics and deaths explode.Please get a second opinion Kathy Taylor
k w	Toronto, Canada	2019-02-01	I too have dense breasts and at risk.
kendra rutledge	Medicine Hat, Canada	2019-02-01	I am signing the petition because as an ultra sound technician I see examples everyday where cancer is picked up on mammography. The recommendation to only have mammos every 2 years can miss a lot of aggressive breast cancers that can grow quickly and spread to the lymphatic system.
Lesley Mattison	Oshawa, Canada	2019-02-01	Because I have seen proof that early detection/screening works. Mammograms have found early cancer before feeling lumps.
Tracey Avery	Medicine Hat, Canada	2019-02-01	We need to be going forward in breast cancer screening, not backwards!! Mammograms SAVE LIVES, I've seen it first hand!
Erin French	North Vancouver, Canada	2019-02-01	Of my mom and my sister!
Alice Daxon	Newmarket, Canada	2019-02-01	I've had too many friends suffer from breast cancer!
Denise Michel	Medicine Hat, Canada	2019-02-01	I have breast cancer in my family and I don't want to die because of these guidelines.
Darlene Hanke	Brooks, Canada	2019-02-01	I also have had breast cancer twice, now again under my arm and lymph nodes, please sign to help women and men also
Lois Maloney	Lethbridge, Canada	2019-02-01	I support that women and the medical system be provided accurate, learned information with regard to breast cancer diagnosis, awareness and treatment options. I cannot fathom why our government would put forth anything less.
Tom Beaumont	Tecumseh, Canada	2019-02-01	Because it needs to be addressed
Vicki Page	Ottawa, Canada	2019-02-01	There is breast cancer survivors in my family but only because it was caught early. Long before anyone could feel it.
Rae Ann Dagenais	Renfrew, Canada	2019-02-01	These guidelines are in serious need of change.
Jill Krzyzanowski	Ottawa, Canada	2019-02-01	My sister discovered her breast cancer through self examination!
Lorraine Bajzik	Oshawa, Ontario, Canada	2019-02-01	Because woman make up more than half the population. Yet our health concerns have been put second for a considerable amount of time.

Name	Location	Date	Comment
Bob Nishikawa	Pittsburgh, Pennsylvania, US	2019-02-01	I do breast cancer research. The most up to date data shows a strong benefit for starting screening at 40. Many lives can be saved for a small risk to individual women.
Rowan Eggsgard	Ottawa, Canada	2019-02-01	My mother had breast cancer
Sherry-Lynn Scobie	Beachburg, Canada	2019-02-01	My family has a history of breast cancer and if it weren't for early detection through the mammograms, my 3 aunt's might not be here today.
Diane Boulanger	Mahone Bay, Canada	2019-02-01	Early detection is so important in the fight against cancer. Yet they are now recommending not to screen women in their 40's. Seems to me like a step in the wrong direction.
Carol Nordquist	Lethbridge, Canada	2019-02-01	It's important
Ray Ouellette	Whitby, Canada	2019-02-01	very important
Jenn Cullimore	Calgary, Canada	2019-02-01	I'm signing because I am genetically susceptible to getting breast cancer!
Heather Kleywegt	Kingston, Ontario, Canada	2019-02-01	My mother had breast cancer. Raising my and my sisters risk. Why is women's health still so outdated?
Lauree Closs	Kingston, Canada	2019-02-01	Women deserve the best possible care
Sharron Fillator	Ottawa, Canada	2019-02-01	Women's lives matter!
Doreen PLouffe	Vancouver, Canada	2019-02-01	Stop this immediately
Peter hill	Toronto, Canada	2019-02-01	LOOK AT THE RESEARCH N O T THE POLITICS PLEASE.
stacey butters	Vernon, Canada	2019-02-01	As a GP mammography screening in a woman's forties is imperative to diagnose and treat breast cancers early. Let's not regress!
Susan Murray	Oshawa, Canada	2019-02-01	Some of my family (cousin & niece) have survived breast cancer & I feel any woman from age 25 to whenever should be tested, more so if prevalent in their families
Andrea Brodowski	Calgary, Alberta, Canada	2019-02-01	I was 43 when I was diagnosed through a mammogram and ultrasounds. Screening needs to begin before 50.
Melissa MacDonald	Moncton, Canada	2019-02-01	The government should be ashamed!
judy Charles	Ottawa, Canada	2019-02-01	i care!
Shandelle Carrigan	Oshawa, Canada	2019-02-01	My mother is a survivor ! My great aunt is a survivor! For all women fighting and who will have to fight for this.
Hazel Lawrence	Whitby, Canada	2019-02-01	I believe they need to make changes to our systems.
Gemma Martinelli	Croton On Hudson, New York, US	2019-02-01	Because it is so important to be screened for breast cancer

Name	Location	Date	Comment
Leonor Etkin	Vancouver, British Columbia, Canada	2019-02-01	Is the task force made up of men only? If so, women should be in charge of screening for prostate cancer.
Christine Rouget	Vancouver, Canada	2019-02-01	cancer survivor thanks to early detection
Louise Bird	Wawota, Saskatchewan, Canada	2019-02-01	I am a breast cancer survivor and screening is critical for early detection. To the policy makers "think of your wife, sister, mother what type of breast cancer screening would you want for them". Now think of every woman in Canada!
Sandy Giffin	579 Peneshula Rd White Lake On, Canada	2019-02-01	Matter of urgency
Sonya Bereza	Winnipeg, Canada	2019-02-01	I am in my 3 years of being cancer free, i had breast cancer not once but twice I am very lucky so far! And still scared! They were able to catch it early, so I had no treatment both times. So the earliest you can catch it, the best chance you have. A win win for both, us and the cost! Right?
Barbara Giroux	Sudbury, Canada	2019-02-01	Evidence states that the old guidelines are flawed. Women will die because of it.
Sherri leger	Moncton, Canada	2019-02-02	I know women who were diagnosed with breast cancer in their 30's.
Vida Woodworth	Hardwood Lands, Canada	2019-02-02	I want women to have a chance to fight. Early detection is so important.
Susan Blackmer	Ottawa, Canada	2019-02-02	His feels like a step back in time. No self exams?! No recognition of breast density? You can do better!
Marlee Franz	North Bay, Canada	2019-02-02	I have had breast ca - age 49
Marcia Campbell	Yellowknife, Canada	2019-02-02	The Task Force used old data from 40 years ago. No data from digital imaging studies have been included
Whitney Zelmer	Ottawa, Ontario, Canada	2019-02-02	It's the right thing to do.
Sandra Schechtel	port moody, Canada	2019-02-02	This is so wrong.
Alison Smith	Ottawa, Canada	2019-02-02	I know too many women who have had and who have died from breast cancer.
cindy gaudet	Riverview, Canada	2019-02-02	Women's health matters! Every woman that I know who has breast cancer, including myself, got diagnosed before 50.
Maryse Rogers	Moncton, Canada	2019-02-02	Had a double mastectomy and know of women in their 20s, 30s, etc who have had breast cancer. If there is a history in the family, tests should be started at a younger age.
Natalie Juhasz	Ingleside, Canada	2019-02-02	We need to take care of ourselves. Cancer runs in our family. Patients have needed chances when this is detected I the early stages.

Name	Location	Date	Comment
Mandy A	Bowmanville, Ontario, Canada	2019-02-02	I am watching a friend of mine go through this right now and if not for early detection, well I can't even think of what that would mean.
pamela coculuzzi	Almonte, Ontario, Canada	2019-02-02	this is wrong.. we should up date
Stacey Stewart	Edgetts landing, Canada	2019-02-02	I'm signing because I want my daughters to be protected.
Linda Vogels	Moncton, Canada	2019-02-02	I believe it's time to change things to more safe practices!!!
Kim patton	Maidstone, Canada	2019-02-02	Im signin thiis bc my sister had a double mastectomy....bc my daughters...myself...and granddaughter r at HIGH RISK.....2 of us has had verval cancer...THIS NEED TO FIXED AND FIXED NOW....
Elizabeth Evenson	San Antonio, Texas, US	2019-02-02	My mom's a survivor.
Tanya Collins	Coquitlam, Canada	2019-02-02	Of my beautiful brave sister diagnosed at 40 years old....let's get with the times people!
Devon Isaacson	Campbell River, Canada	2019-02-02	My mom had screenings every year and one year a cyst was found. Who knows what would have happened if it wasn't detected eary.Women with a family history should also start at 35 not 50 when it's too late!
Laura Jones	Calgary, Canada	2019-02-02	I do not like the lack of attention given to expert advise and that the panel lacks experts. I also do not like not recalling for further tests. Proper diagnosis and a thorough investigation into possible disease must be the priority.
Johanne rondeau	Timmins, Canada	2019-02-02	I believe in screening as often as is safe as early detection and prevention.
Kelly Campbell	Moncton, Canada	2019-02-02	I am fighting metastatic Breast cancer diagnosed Jan 11/19 at 45 years old. Was originally diagnosed Dec 23/15 at 42 years old. Cancer does not care how old you are and there are A lot of women even half my age getting it as well. This NEEDS to change
Andrea Arsenault	Moncton, New Brunswick, Canada	2019-02-02	As the daughter of a 2 time breast cancer survivor I actually find these recommendations to be terribly misguided. Why would less screening ever be an option? This is madness
Carole Lavoie	Timmins, Canada	2019-02-03	I have seen first hand what screening finds and how the recall and extra imaging can detect.
Sharon Vincent	Renfrew, Canada	2019-02-03	Too many die to early because of this
Melissa Ashley	Winnipeg, Manitoba, Canada	2019-02-03	Respect the science and experts!!!
Dense Breasts Canada	Toronto, Canada	2019-02-03	Thank you for your comment Kelly.
Michael Perreault	Toronto, Canada	2019-02-03	Mammograms save lives, and I am grateful for the fact that my mother has a doctor that advocates for her overall health with

Name	Location	Date	Comment
			proven technology. Within the past two months my mother has been examined, diagnosed, and supported by an exceptional surgical team. She's now on the road toward radiation. Minister, if these proposed recommendations were currently in place, her aggressive form of cancer would have claimed her life within the year. Trust the technology and the QUALIFIED experts.
Marc Belanger	Gatineau, Quebec, Canada	2019-02-03	One of my relatives died of breast cancer and i know many women that either had breast cancer or fighting it now
Roger Ferris	London, Canada	2019-02-03	Our women deserve the best possible opportunity to catch and treat this awful disease.
Katie Pennington	Clover, South Carolina, US	2019-02-03	Ive had many family member die because they never had early detection.
Kathy Dean	Kitchener, Canada	2019-02-03	I am a two time breast cancer survivor and am appalled at these new guidelines ! Was told that screening needs to be cost effective! Cannot find any guideline for post mastectomy guidelines ! There are many of us ! Screening saves lives !
Ann Faulkner	Bobcaygeon, Canada	2019-02-03	Screening are extremely important, 2 friends, in their 70's were diagnosed through screening, both in November last year
Luisa Domingo	Toronto, Canada	2019-02-03	My cancer was found early and on routine screening. One year ago I had nothing.....today I have breast cancer. Screening works and should be available to everyone and every year.
Cathi McClure	Paget, Bermuda	2019-02-03	If I hadn't self examined, my lump would have gone unnoticed for who knows how long!! Started treatment right way!!
Leissa Haskins	Calgary, Canada	2019-02-03	As a breast cancer survivor, who was diagnosed with aggressive breast cancer at the age of 46, I find these new guidelines ridiculous. I would not be typing this had I not been going for yearly mammograms.
Cathy Chapman	Guelph, Canada	2019-02-03	I know people who have or have had breast cancer. It's very scary. It's extremely disappointing that the health of women in Canada is still considered unimportant. Women are the backbone of many families, they share in the financial workload with their husbands, partners. Women are integrated into so many areas of society. Women are the foundation of families. Women care!!
Tony Cavaliere	Ajax, Canada	2019-02-03	As great as men think we are Women are the true hero's. This world & our future can't survive without them. We need to do more not less.
Jennifer Collinson	Canada	2019-02-03	Jennifer Collinson
Maria Abdo	Vancouver, British Columbia, Canada	2019-02-03	This gamble isn't worth the amount of lives it's going to take.
Leslie VanDusen	Nanaimo, Canada	2019-02-03	Mothers, sisters, daughters, and friends need the best advice and care. This is a let-down. Shame.

Name	Location	Date	Comment
Tarra Shipman	Edmonton, Canada	2019-02-03	here is the link to my petition if anyone is interested as I will support any and all petitions in Canada related to accessibility, invisible disabilities that are as neurotypical people say 'high functioning ' as like you I have autism and adhd and we too need help !!!! please review my petition and help me break the silence as most issues like mine are still considered a male disability and thus why most things related (ie studies and videos) show only male kids or severe male adults under 30 and yet many are like me....woman ,44 and independant and some of us have families and live like or near to a normal life and most society but with one issue we are born with a slight difference for which makes life challenging thus induce meltdowns and other comorbid issues https://www.change.org/p/we-need-better-services-for-those-with
Carol Treslove	New Westminster, Canada	2019-02-03	My sister had her first mammogram in her 40's. She had breast cancer. Because of this early detection, she is still with us. I had Mammogram every year. One year nothing and the next year I had breast cancer. Again early detection saved me. This is not acceptable. Women are dying at an alarming rate.
lois Millman	Surrey, Canada	2019-02-03	I am alive because of early detection of my breast cancer. Stop this nonsense!!
Lisa Sirlin	Canada	2019-02-03	I have been affected, personally, with breast cancer
Andrea McCormack	York, Canada	2019-02-03	I have a family history of breast cancer as well as 10 friends, 40 years old and younger, who have been diagnosed with breast cancer.
Leonard Zajackowski	Toronto, Ontario, Canada	2019-02-03	Early detection saves lives.
Janet Penner	Abbotsford, Canada	2019-02-03	I am a breast cancer survivor .. I was detected early.. that was 21 years ago.. in saying this .. I firmly believe, that finding it all is key .. find out cause so no one has to endure the cure !! Inhuman!!!
Julie Hutka	Thunder Bay, Canada	2019-02-03	My daughter was diagnosed at 33.
Shelley Kean	Kelowna, Canada	2019-02-03	"There are no breast cancer experts on the Task Force." This speaks volumes in itself.... do not ignore the Experts' advice.
Len Coste	Oxford Station, Canada	2019-02-03	Anything which catches cancer early is a good thing in my books.
Teresa Lem	Mississauga, Canada	2019-02-03	TLem

Teresa McFadyen	Saanichton, Canada	2019-02-03	As an oncology nurse, early screening and detection is mandatory.
Marie Bates	Toronto, Canada	2019-02-03	The world needs women alive and well!
Danelle Smith	Etobicoke, Canada	2019-02-03	I got breast cancer before I was old enough to be screened.

-high-fun

Name	Location	Date	Comment
Donna D. Peerless	Vancouver, Canada	2019-02-03	An ounce of prevention is worth a pound of cure.....don't you know?!
Jurdica Azevedo	Mayerthorpe ,Alberta, Canada	2019-02-03	I found my own breast cancer lunch because I was told that you needed to have mammograms
Mildred Lynne Schellenberg	Canada	2019-02-03	I am a 25 year breast cancer survivor; my cancer was detected in my 40's because I knew self breast exam A rebel teacher back in the 1960's got all the girls in our highschool together and taught us self breast exam, that teaching lead to my own fingers finding a lump that mammography missed a year earlier. You cannot draw a line and say no screening till your 40 because some of us do develop breast cancers earlier than our 40's and it's highly unfair for a woman under 40 to have to agonize about breast cancer but wait for valuable screening and possible treatment until she reaches 40.
Shari Andrews	Toronto, Canada	2019-02-04	As soon as I was able to get a Family Doctor, I Asked for a Mammogram Because My Father Died Of Cancer and it's affected others in my family as well. She Refused Telling Me that the Laws had changed and I had to wait until I turned 50yrs. Within a month after my 50th Birthday, I received something in the mail regarding testing and I Didn't Even Have To Go Through My Family Doctor So I Called and booked an appointment right away!! Then the Real Nightmare Began!! They saw Something so I Had To Go For an Ultrasound and More Detailed X-RAYS...Again they saw something so I went for a Biopsy and to put Markers in for Another Test!! In Any Event Right Then I Say And What If I Do Have Cancer? I Was REFUSED Testing in My 40's so I Could Have Had a Tumour Growing for the Past 10 years & So What?! Nooo! Firstly, if an Immediate Relative Has Suffered with ANY Type of Cancer...You Should Definitely Be Allowed to Be Tested!! So what if my dad's cancer was EVERYWHERE Else But in his Breast Does That Really Lessen
Virginia Bourner	Oakville, Canada	2019-02-04	My diagnosis was detected by mammogram, the cancer could not be felt by manual screening. Mammograms are important to detect it early
Jurdica Azevedo	Mayerthorpe ,Alberta, Canada	2019-02-04	I had breast cancer and found my own lunch so it be nice if they would have screen for breast cancer
Larry Hamilton	Lethbridge, Canada	2019-02-04	Why can't the government get the info right?

Michelle Melnychuk	Brooks Alberta, Canada	2019-02-04	It saved some of my cousins Lives
April Johnston	Mississauga, Canada	2019-02-04	This is important to women health
Marilyn MacLean	Mt. Hope, ON, Canada	2019-02-04	I personally know 3 women diagnosed with breast cancer in late stages while still in their 40's and with no family history. Age limits must be lowered!

Name	Location	Date	Comment
Nancy Boggis	Stittsville, Canada	2019-02-04	Why is there not more thorough testing for women with dense breasts? All screening is important.
Vivian King	Kaleden, Canada	2019-02-04	There is just too much being missed
marty bostic	Ottawa, Canada	2019-02-04	I have been screened for many years and I know what the importance of this screening is and it should be supported by Canadians. Stay with the old and stop risking lives just to save money. Taxpayers are paying for this and no one wants the lives of their mothers, sisters, daughters, grand-daughters risked because of monetary gain!!!!
Lisa Derby	Trail, Canada	2019-02-04	My close friend has terminal breast cancer due to dense breast and her mammogram didn't catch it. She fought it once but it came back 3 yrs later -43 yrs old
Dense Breasts Canada	Toronto, Canada	2019-02-04	Thank you very much for your comment.
Courtney Gow	Alliston, Canada	2019-02-04	Courtney Gow
Janet Love	Toronto, Canada	2019-02-04	Screenings may be uncomfortable but they are necessary along with self examinations. This is why I signed this petition will you join me?
Michael Bechard	Brampton, Canada	2019-02-04	Four thousand women deaths in the next ten years due to deliberately not listening to the recommendations of all those experts just ostensibly to save a bit of money means one heck of a lot of blood on the hands of the federal government's health ministry. This is serious! And it would just ending up costing us more in the long run anyway – money wise and family wise!
Sameera Yusuf	Fredericton, Canada	2019-02-04	Every woman matters!
Nigar Islam	Kanata, Canada	2019-02-04	I have been screened for many years and understand the advantages of screening. Even a small mole on the surface and a small, irregular cyst were detected as a result of screening. Do not be "penny wise and pound foolish" please.
Joyce Hamelin	Ottawa, Canada	2019-02-04	My sister was in her 40s when she developed breast cancer. Women who develop breast cancer before age 40 are more likely to die from breast cancer. Not screening women in their 40s is plainly placing them at risk of death. I am a woman with a history of breast cancer in her family and I am a woman who has dense breasts and this places me at higher risk. Why is it that the Task force had no experts on the task force and why is it that the advice of experts was ignored? Why did the Task Force use outdated research with wrong statistical outcomes? This is horrendous. Stop these false and harmful Guidelines from being published and they need to be revised immediately. Women's lives, my life depends on it.
Vicki Romanin	Whistler, Canada	2019-02-04	At 51 I was diagnosed with breast cancer after finding two small lumps myself. This cancer started in my 40's. Yes, I have dense breasts and am glad it is being recognized as a serious risk factor. Mammograms - yes! However, for those of us in the "dense"

Name	Location	Date	Comment
			category, recognition (by patients and doctors) and further (advanced) tests should be required.
Gisele Cote	Orleans, Canada	2019-02-04	Gisele Cote
Sheri Bunce	Pickering, Canada	2019-02-04	I have seen what women go through that have been diagnosed with breast cancer first hand. I have had many scares in the past & rely on this testing to ensure my health.
Chris vrecko	Lethbridge, Canada	2019-02-04	The unnecessary exam is a waste of money if there is nothing pointing that way. Yes I am a woman, maybe men at a certain age should have their testicles squeezed just to make sure.
Alison Wieler	Langton, Canada	2019-02-04	My future depends on it!
Ebow Amoah-Gyampoh	Winnipeg, Canada	2019-02-04	the task force is using flawed information that needlessly puts women at risk.the guideline must be revised.
Gail LeCocq	Newcastle, Ontario, Canada	2019-02-04	Jill Dumaresq
Susan Bazinet	Ottawa, Ontario, Canada	2019-02-04	I have hd breast cancer and it was found with a mammogram
Cecilia Aguilera	Winnipeg, Canada	2019-02-04	I survived breast cancer! ...i know how importante it is the screening process.
Deborah Potts	London, Canada	2019-02-04	My sister in law was gone before age 40. This is nonsense. This is our government working hard to kill us.
Lorraine Measor	Moonbeam Ontario, Canada	2019-02-04	I think every woman over 40 should be screened until the age of 75!
Donna Chaisson	Keewatin, Canada	2019-02-04	I believe women deserve the best possible screening of breast cancer.
Janet Fox	US	2019-02-04	Breast cancer screening is imperative!
Diane Paquin	Montréal, Canada	2019-02-04	Diane Paquin
Beverly Schott	Brandon, Canada	2019-02-04	Beverly Schott
Shazia Kamboh	Richmond Hill, Canada	2019-02-04	My mom had breast cancer. She lost both of her breasts and we are lucky she didn't lose her life. Early detection is a must and women must be screened at 40 onwards. My sister in law in the states had her first screening at 40 & every 2 yrs after that.
Mary McCallum	Southampton. On, Canada	2019-02-04	mmccallum@bmts.com
Susan Demeter-St Clair	Toronto, Canada	2019-02-04	To be frank I would be dead had these new guidelines been in place when I was diagnosed at age 46 with no family history nor other high risk factors. Please revise this so young women will not needlessly die. As a survivor I am horrified by this knowing my

Name	Location	Date	Comment
			cancer would not have been caught until a later stage had these guidelines been in place.
Aa-Ilesha Sevis Martin	South Africa	2019-02-04	Ladies againts Breast Cancer
Lois Wales	Selkirk, MB, Canada	2019-02-04	Am so appalled by the government's actions.
Julie Jordan	Edmonton, Canada	2019-02-04	I was diagnosed in my 40's. A mammogram saved my life.
Judi Clark	New Westminster, Canada	2019-02-04	I'm signing because I'm living with breast cancer that was discovered through mammogram
Lorne Ottway	Medicine Hat, Canada	2019-02-04	I'm signing because these new guidelines are outrageous and dangerous!! How can you put new guidelines in place when you know nothing about breast cancer, and you ignore the experts advice? That is sheer arrogance and stupidity, and typical of the liberal party!!
TakHay Chan	Richmond, Canada	2019-02-04	My grandma died from breast cancer.
Josie D'Alessandris	Toronto, Ontario, Canada	2019-02-04	Fuck Cancer!!!!!!
Allan Garland	Canada	2019-02-04	I object to faulty guidelines designed to save governments money.
Vicky Bownes	Bloemfontein, South Africa	2019-02-04	This is ludicrous!!!Woman at any age is susceptible to Breast Cancer. I worked for a Radiologist for 20years.....Do not gamble with life threatening diseases....
susan ritchie	squamish, Canada	2019-02-04	My breast cancer was found by mammogram when it was small and easily removed. The anxiety caused by being recalled for a follow up mammogram was nothing compared to the tumour not being found. Please reconsider your recommendations. Young women deserve the opportunity to be proactive in the fight against this often life changing disease.
Corazon Beboso	Montréal, Canada	2019-02-04	Breast Cancer can be stopped!
monica nelson	Victoria, Canada	2019-02-04	This is ridiculous!
Maria Geatros	Vancouver, Canada	2019-02-04	Maria Geatros
Karen Ackerman	Winnipeg, Canada	2019-02-04	2 of My good friends died of Breast cancer in their early 40's
Beth Johnson	Whitby, Canada	2019-02-04	My Mom had breast cancer and FUCK CANCER!!
Marcia Mosher	Thunder Bay, Canada	2019-02-04	True enough, new guide lines need to be set in place.
Carolyn Milford	Oakville, Canada	2019-02-04	I'm signing because I want to make an important comment. They have recently admitted that DAIRY PRODUCTS cause cancer. It's full of GH which is Growth Hormone, meant to cause rapid growth of a baby cow but actually causes cancer to grow in cell we all carry harmlessly. Yet, women are advised to eat yogurt cheese etc

Name	Location	Date	Comment
			to ensure they get their calcium. Why is this not in your petition points???

Trudy Angell	Clareville, Canada	2019-02-04	Trudy Angell
Tracy Kitchen	Oshawa, Canada	2019-02-04	Breast cancer survivor of Stage 3.
Daniela Brinzoiu	Laval, Canada	2019-02-04	Without our health we are nothing! Without making sure we trust our medical system we will be nothing!
Louise Jack	Saugeen Shores, Canada	2019-02-04	Women's health is important!
M. B.	Amherstburg, Canada	2019-02-04	I'm signing because the Health Minister realizes this all comes down to money. Maybe finding cuts somewhere else is the answer.
Lois Perreault	Perth, Canada	2019-02-04	I care. I have many friends and relatives who are alive today because of early detection! And older women matter too!!!!
Robin Goodfellow-Baikie	North West River NL, Canada	2019-02-04	I am 77, and had breast cancer 12 years ago. It was detected early because of a mammogram, so no chemo. I am grateful and want it for others (especially those with dense breasts). I am glad to be alive, and my life is productive and enjoyable, despite mastectomy.
Deb Enright	Renfrew, Canada	2019-02-04	Breast screening is an important tool for and should be available to all.
Lorraine Pereira	Burlington, Canada	2019-02-04	Breast cancer in our family.
Thomas Van Dusen	Belleville, Ontario, Canada	2019-02-04	I am signing this petition because I lost my Father to Cancer in 2005. Something has got to be done with drastic measures, to put an end to this disease. I am 67 years of age . I hope that before my days are over, I see a cure to Cancer,
kathleen christensen	WINNIPEG, Canada	2019-02-04	My sister's sister in-law has breast cancer. my sons friends wife has breast cancer, ans I could go on :(
Judy Istace	Saskatoon, Canada	2019-02-04	Please listen to the breast cancer experts and reject the new guidelines.
Sandy Sinclair-Krauthaker	Canada	2019-02-04	I had my first mammogram at 45 years old. I was diagnosed at age 50 with breast cancer. Wake up people, breast cancer occurs at any age!
Debbie Brown	Indian River, Canada	2019-02-04	I have dense breasts
Susan Tattle	Toronto, Canada	2019-02-04	Please don't put financial issues over health prevention. Care for us like you would your mother.

Name	Location	Date	Comment
Millie Lill	Denison, Iowa, US	2019-02-04	My sister in law had breast cancer, as did my sister.
Natasha Landry	Orleans On, Canada	2019-02-04	J'ai déjà eu un cancer! Ça ébranle tout le monde autour de soi! On se DOIT d'être à la fine pointe des recherches pour s'assurer qu'on se bat, main dans la main...
Verna Korkie	Canmore, Canada	2019-02-04	This diagnosis remains clothed in fear and anxiety. When will this change? The radiologist who reviewed my mammogram did an ultrasound on the spot as there was a suspicious area. It turned out to be normal breast tissue. I see no reason why this can't be done for any woman whose mammo needs further follow-up. As for young women in their 40s, yes, let's try to save lives.
Marilyn Page	Fort St John, B.C., Canada	2019-02-04	Health items are very important. People on this debate should know about these items .
Grigoryeva Irina	Vancouver, Canada	2019-02-04	I'm a woman and I'm scared.
D Murphy	Norwood, Canada	2019-02-04	Start removing Soya's from all of our packaged food!!!! This chemically induced poison, increases estrogen levels and contributes to the growth cancer cells and breast cancers, as well as inhibiting the immune systems of children and adults this is why our systems are not protecting us from sickness and diseases, there is absolutely no reasons for it to be in everyone's food, from chocolate to peanut butter and kraft dinner,packaged vegetable,babies formula and the list goes on and on. It only began in the 1990's and take a look at how many ill people there are now? The mammogram and biopsy protocols are invasive and painful and disturb the cancerous growth if any? Radiation and chemotherapy destroy healthy cells that are attempting to repair the body!!! In short the entire system needs to be overhauled. Boycott the companies that insist on using harmful ingredients in their products or make everything from scratch that way you will know what your eating. It's better to get to the root of the problem and det
Donna Dean	Whitchurch-Stouffville, Canada	2019-02-04	I am signing because, as a nurse working in radiology with the mammo techs, we saw too many women in their 40s with breast cancer that could have been detected earlier with a routine baseline mammogram at 40. There is no excuse for this. Help us save more lives with early baseline screening. It's not always about money. This is about saving young women's lives!
Nancy Picken	Thornhill, Canada	2019-02-04	npicken32@gmail.com
Melanie Humphreys	Grand Forks, Canada	2019-02-04	I'm signing because I'm a woman and this affects all of us.
Arlene Hunter	Nelson, Canada	2019-02-04	I don't believe when it comes to cancer that any of our Health Ministers or people from the cancer society really care. I have lived a fairly long life and have not seen or heard where the Health Minister listens to the PEOPLE! Particularly women at this guideline. Sad, very sad.
Linda Colter	Canada	2019-02-04	Cancer sucks

Name	Location	Date	Comment
Bonnie Huczek	Toronto, Canada	2019-02-04	My mother had breast cancerI had breast cancerI have a 42 year old daughter
Donna Reid	Arnprior, Canada	2019-02-04	I have friends who were diagnosed in their forties.I have had a false positive scare but I would rather that, than missing a diagnosis. I have dense breasts and don't want to take chances.
Janet Person	Sidney, Canada	2019-02-04	I was diagnosed with breast cancer in my mid-forties. I have very dense breasts and found the tumour through self exam. I now have metastatic breast cancer. Anything that could reduce the chances of what I went through and the shortened life expectancy I am facing should be pursued. Please recall these misleading guidelines.
Carlyn Mendoza	Winnipeg, Canada	2019-02-04	My mom got hurt during a mammogram!
Andrea Mather	Moncton, New Brunswick, Canada	2019-02-04	I'm 43- invasive lobular breast cancer. Double mastectomy Dec 11, 2018.Everything they saw on imaging was "low risk"Lumpectomy in November revealed 10 more cancer than initially seen.Undergoing chemo and next radiation. Don't mess with this Government of Canada-stay in your lane- this is not your expertise!!!!
Andrea Levy	Raanana, Israel	2019-02-04	I discovered a lump upon self-examination, which was found to be an aggressive form of breast cancer
April Chabot	Winnipeg, Canada	2019-02-04	It's also time to stop subjecting women to barbaric and inhumane methods of screening that research has proven INCREASE women's chances of cancer. Men would never be subjected to the torture of mammogram machines. We deserve better!
Susan johnson	Cambridge, England, UK	2019-02-04	My name is Susan Aldous just want to help people who have cancer to have a better chance
Jeanne Bennett	Renfrew, Canada	2019-02-04	I am a woman and have 3 daughters . I want the best up to date testing for myself, my daughters, and all women.
Rose Brophy	Stellarton, Canada	2019-02-04	For myself and future generations!
Dwayne Laffin	Trenton, NS, Canada	2019-02-04	I am signing to reject the dangerous breast cancer screening guidelines.
Marilynne Stark	Vancouver, BC, Canada	2019-02-04	My two sisters and I have had breast cancer..one sister passed and one had it twice a and I am six years from diagnosis.... we have daughters! Early diagnosis is key...
Judith Hayes	Toronto, Canada	2019-02-04	I want decisions to be based on sound, current studies and to include experts on decision making panels
Kelley Hawes	Kingston, Jamaica	2019-02-04	Our voices need to be heard!
Morag Wright	Troon, Scotland, UK	2019-02-04	Early detection is imperative and 2 of my closest friends have survived because of that !
Brian Mackie	Montague, Canada	2019-02-04	I am sure there is a lot of fat can be trimmed before they start cutting corners with my wife.

Name	Location	Date	Comment
Ronnie Robertson	Toronto, Canada	2019-02-04	women deserve the very best technology to detect breast cancer.
Julie Cathcart-Yeomanson	Oshawa, Canada	2019-02-04	Breast cancer has affected too many people in my life!
Kayla Picard	Smiths Falls, Canada	2019-02-05	I want change!
Vic Accrocco	Oxon Hill, Maryland, US	2019-02-05	Everyone should get good health care at an affordable price!
laura johnson	Powell River, Canada	2019-02-05	i have lost too many women in my family to breast cancer
Elizabeth Bragg	Niagara-on-the-lake, Canada	2019-02-05	I signed because I am a survivor of DCIS, an early form of breast cancer! Thank god, regular screening caught this in an early stage. I had genetic screening, no family connection. Environmental causes could be a possibility. Early screening, age 40 and older needs to be re-evaluated to ensure all women have to best information about their health care.
Chantal Whitaker	Whitby, Canada	2019-02-05	I'm signing because our family continues to be touched very closely by this disease.
Richard Bosch	Thunder Bay, Canada	2019-02-05	My wife passed last year from metastatic breast cancer. She was diagnosed at 37, based on her insistence on early screening. Sadly, lack of follow up screening after her double mastectomy resulted in metastasis. Early screening, based on the most recent data is needed.
Susan M	Corner Brook, Canada	2019-02-05	Screening leads to early detection which saves lives, all women deserve screening
Zandrika James	Surrey, Canada	2019-02-05	Clearly changes must be made immediately to the present guidelines so that lives can be saved.
Jillian Daffern	Ajax, ON, Canada	2019-02-05	In honour of 5 women I know who have had early detection.
Penny McLaren	Toronto, Ontario, Canada	2019-02-05	We should all benefit from current, good science, that saves lives.
Dense Breasts Canada	Toronto, Canada	2019-02-05	We are very sorry for your loss.
Kimberly Mills	Toronto, Canada	2019-02-05	My Mother is a breast cancer survivor and was diagnosed early. It is the only option for us! Reject the new guidelines!
Dianna Inkster	Kingston Ontario, Canada	2019-02-05	My mother-in-law died of breast cancer at 56. Her only daughter died of ovarian cancer at 56. I don't want my niece and daughter to go through that sort of disease. Increased screening might help stop lethal breast cancer in this family.
Janice Shaw	Thornhill, Canada	2019-02-05	I'm signing this because women's health is important and Dougie can't go around slashing funding for the most vulnerable among us. For which people?

Name	Location	Date	Comment
Kathleen Sheen	Ottawa, Canada	2019-02-05	More cancer is being found earlier if screening is started in the 40's.
Tom Molyneux	Blenheim, Canada	2019-02-05	This response to having/keeping good guidelines seems to be nothing less than a way to reduce the amount of money that is spent on these measures. Similar to so many other bad cuts!!!Further, it seems to eliminate any intelligence in these " guidelines"!!!!
Dianna Dawson	St Thomas Ontario, Canada	2019-02-05	My mother had a diagnosis of breast cancer and I have dense tissue, putting me at higher risk.
Shawneen Hartmann	Langley, Canada	2019-02-05	Diagnosed with breast cancer at 39 years old. No family history of cancer. Double mastectomy. 65 years old in March.
Pat McGregor	Renfrew, Canada	2019-02-05	Breast screening has been a very important part of my life for over 30 years and preventative steps have been taken to prevent breast cancer.
Kim Davis	Edmonton, Canada	2019-02-05	Less screening is dangerous!
P Chung	Mississauga, Canada	2019-02-05	I'm concerned about my health as well as the health of all women in Canada
shirley nault	Victoria, Canada	2019-02-05	I HAD BREAST CANCER BUT GOT IT IN TIME. STILL NEED CHECKUPS.
Cheryl Raper	Pudsey, England, UK	2019-02-05	Very close to my heart x x
Helen Robert	Basingstoke, Canada	2019-02-05	I have lost family members to breast cancer but have also seen friends survive because of early detection. This is just one more example where women's lives take a back seat to the budget.
morris henoch	winnipeg, Canada	2019-02-05	Morris Henoch
Barb Ferreira	Picton, Canada	2019-02-05	Thermography is also a great less invasive way to screen. We need to be proactive regarding our health
Susan Gowan	Allenford Ontario, Canada	2019-02-06	I want women to get the best screening possible. Have lost many of my friends to this horrible disease. One was wrongly diagnosed so I want to spare any possible suffering.
Noreen McKechnie	Oakville, Canada	2019-02-06	I am a breast cancer survivor whose dense breast tissue masked my cancer for too long
Christine Baker	Hamilton, Canada	2019-02-06	Christine Baker
Anna Stewart	Canada	2019-02-06	Anna Stewart
Nel Peach	Salmon Arm, Canada	2019-02-06	What's up with these Feds and their Health Minister ...lots of ba, ha ,ha about the 2019 Canada Food guide and yet the New Screening Guide lines for Breast cancer are supported , which are way out of line ?? Revise the New guide Lines Now !! Says this Breast cancer Thriver since 1984 !!

Name	Location	Date	Comment
Leigh Walters	Victoria, British Columbia, Canada	2019-02-06	Because I want to help make breast cancer a better diagnosis for all women and the men who get it
Deon Kongus	Canada	2019-02-06	I am 43 and have breast cancer that was not detected on a mammogram due to my breast density. If it had not been for my wonderful doctor, my kids would likely not have had their mom in a few years.
Gail Ritchie	Saskatoon, Canada	2019-02-06	My grandmother died from breast cancer. After my last mammogram, I was told I had dense breasts and that it was difficult to determine if there were any issues. I was referred for an ultrasound and nothing showed up, fortunately. I definitely want women to get the best breast care. We should expect our government to ensure we do.
Nicky Manak	Victoria, Canada	2019-02-06	I was diagnosed at age 40.
Jennifer Tesler	Atlanta, Georgia, US	2019-02-06	breast cancer survivor..
Steven Powell	Abbotsford, Canada	2019-02-06	This should be about putting the best practices in place to save lives. If you ask an expert for advice on how to do that you should be following that advice not ignoring it!
Kimberley Yanick	lake cowichan, Canada	2019-02-06	I fall in the category of having dense tissue. I also found a lump by doing self exams and dr exams.
Tina Joy	Toronto, Canada	2019-02-06	I have very dense breast & have been getting mammograms & breast ultrasounds done for the last 5 years. I've had 2 spot test done. I am due again next month. Age means nothing anymore.
Richard Patterson	Victoria, British Columbia, Canada	2019-02-06	The new guidelines are considered wrong by professionals in the field. They should be changed to satisfy the people who know what they are doing.
Toni Neufeld	Calgary, Canada	2019-02-06	I'm signing this petition as I know too many women diagnosed in their 40's. New guidelines are about budget not womans health.
margaret deutsch	oshawa, Canada	2019-02-06	These guidelines are not better for women and will cause deaths. Who is making these decisions? I had always had dense breasts before I had a hysterectomy. I was thankful for mammograms.
Nicole Danielle Niles	Kamloops, Canada	2019-02-06	Too many women I personally know have lost their battle with breast cancer. We deserve better.
Katie Powell	Abbotsford, Canada	2019-02-06	Breast Cancer should be treated seriously for women of any age. Medical professionals should be leading the way on this.
Paula Valerio	Mississauga, Canada	2019-02-06	Better to be safe than sorry.
Judy Wallace	Coquitlam, Canada	2019-02-06	I have been just diagnosed with breast cancer for the 2nd time...luckily I have been vigilant and persist with my mammograms! Please do not go backwards and deny women adequate health care testing and follow ups. Extra tests may cause

Name	Location	Date	Comment
			anxiety BUT the alternative is allowing a small tumor to grow and invade adjacent tissue . The whole reason for mammograms is early detection! Self exams are also a #1 part of a woman's own way to manage her breast health . Can't imagine anyone saying 'don't bother' . Please rethink these ridiculous guidelines..
Cathy Chapman	Guelph, Canada	2019-02-06	I know people who have or have had breast cancer and some who have had mastectomy. The members of this so called task force need to be removed and experts in cancer and men and women who have had face it need to start writing new guidelines. I'm extremely disappointed and insulted that this task force are ignoring a very important need. Step up or step down!
Andrea Keegan	Calgary, Canada	2019-02-07	I was diagnosed early for Colorectal Cancer because of symptoms not screening. Better screening needs to be available for any cancer!
Anne Laroche	Kamloops, Canada	2019-02-07	Thank you Liz. This seems like a blatant cost saving measure and such a regression. Early detection is key to improved odds of survival.
Leah Kowk	Kelowna, Canada	2019-02-07	I'm a woman, and would love a better process
Karen Anderson	Kamloops, Canada	2019-02-07	Breast Cancer runs in my Family.
Amy Seabrook	Vic, British Columbia, Canada	2019-02-07	Things need to change
Bob Steinberg	Winnipeg, Canada	2019-02-07	Screening saves lives. Including my wife.
Kathryn Arcudi	Pointe-Claire, Quebec, Canada	2019-02-07	In my opinion mammograms can save lives by diagnosing breast cancer at an earlier stage given that many women cannot feel anything when doing breast exams and breast cancer can be missed... early detection is key to improve survival
Lynne Mackie	Courtenay, Canada	2019-02-07	I'm a woman.
Cyndie Lack	Victoria, Canada	2019-02-07	Disappointing when current information is ignored, presumably to save money - preventive medicine is no longer the norm and is ultimately cost and life-saving.
Marie or John Doré	Iroquois Falls, Canada	2019-02-07	family history of breast cancer
Audrey Wright	Kamloops, Canada	2019-02-07	I have had breast cancer TWICE! Deadly cancer killed most of my ancestors & immediate family. These guidelines are criminal. No excuse!!!
Loretta Dray	Dunville, Canada	2019-02-08	Disagree with the new regulations.
Baljinder Irvine	Duncan, B.C., Canada	2019-02-08	Too many lost lives...
Doreen Coffey	Placentia, Canada	2019-02-08	Early detection may save some one's life.

Name	Location	Date	Comment
Edith Warner	North Vancouver, BC, British Columbia, Canada	2019-02-08	I care about this.
Maureen Dugal	Airdrie, Canada	2019-02-08	It's the right thing to do!
Yvonne Careen	Point Lance, Canada	2019-02-08	I have sisters and friends who have breast cancer. I have a family history and I think it is important to have your regular mammograms.
Maureen young	Branch, Canada	2019-02-08	Early detection can save lives
Tonya Kehoe	Maple Ridge, Canada	2019-02-08	I signed to honor the memory of those who lost their lives to breast cancer and to celebrate those who survived this diagnosis. Early detection means the difference between life and death and we are worth it!!
Nancy Di Iorio	Montreal, Canada	2019-02-08	My mom died of breast cancer at the age of 58.
Elaine Careen	Saint Albans, Canada	2019-02-08	careen
Lynne Brown	Sechelt, Canada	2019-02-08	I've had breast cancer twice. Both times the cancer was detected by mammograms
Augustina Alexander	Lillooet, Canada	2019-02-09	I have women in my circle that I love dearly, I want them to get the best care, especially if it available, & to be based on new information from new research. Women have a right to this.
bride walsh	Dunville, Canada	2019-02-09	Bride Walsh @hotmail.com
Linda Chindemi	Etobicoke, Canada	2019-02-09	I am a mammographer and see all too many younger women come in for screening mammograms completely asymptomatic only to get a positive diagnosis. If screening is cut how many women's cancers will be missed? Even one is one too many!!!
Diana Bertram	Ladysmith, British Columbia, Canada	2019-02-09	My breast cancer was found because of mammogram
Karen McCullagh	Langdon, Canada	2019-02-09	Women deserve access to early detection and treatment.
Diane Friesen	Mission, Canada	2019-02-09	My sister died from breast cancer and I think mammograms and self examination are very necessary.
Dense Breasts Canada	Toronto, Canada	2019-02-09	We are so sorry Diane.
Dense Breasts Canada	Toronto, Canada	2019-02-09	Thank you for commenting. Wishing you all the best.
Sage Seib	Edmonton, Canada	2019-02-09	Many of my aunts developed breast cancer over their lifetimes and it was on both maternal and paternal sides of my family. Therefore my Dr. recommended me to have yearly mammograms. I strongly believe in this and have had only one scare so far. It seems to me that people in power are always willing to take numerous risks at the expense of women's lives. Big NO to this one.

Name	Location	Date	Comment
Sandra Johnson	Courtenay, Canada	2019-02-09	Outrageous that women's healthcare is so outdated and backward!!
Ms. H. Pindar	London, ON, Canada	2019-02-09	These "new guidelines" for breast cancer screening are just simply a recipe for a lethal outcome!!!
Heidi Coleman	Kamloops, Canada	2019-02-10	I'm signing because this is wrong and needs to be revised.
Jennifer Roadley	Varenes, Canada	2019-02-10	I had breast cancer and i have dense breast, mammo and echo did not find anything on the screen so then had a biopsy because we all felt a lump
N A	Slave Lake, Canada	2019-02-10	I have breasts.
Jana Hopper	Calgary, Canada	2019-02-10	I was diagnosed with breast cancer as a result of screening and survived because it was caught so early
Therisa Poole	Merritt, Canada	2019-02-11	Therisa Poole Merritt Canada
